IOWA PUBLISHING COMPANY PUBLISHERS

### PREFACE.

The publishers take great pleasure in presenting this directory to the citizens of Des Moines and Polk County, feeling assured that it will prove to be the most reliable reference work of the entire county yet issued.

It contains a review of the resources and industries of the county, and the trade, commerce and varied interests of Des Moines, also a complete residence and business directory of the entire county. Following the residence of the city and suburban towns is that of the farmers and the towns of the county, and cards of our leading enterprising business houses.

It was intended to have published the directory last fall, and the work was in course of preparation, but on account of the change of the numbers of the lots in the resident portion we were obliged to re-canvass the city in order to secure the new numbers. This delay caused some disappointment to many, but more to the publishers, as it necessitated so much greater expense. The directory of the city will be published annually hereafter, as the rapid growth of Des Moines renders a new work necessary every year.

The population of the county at this time is about 55,000. The city of Des Moines, including her suburban towns, has 42,753 inhabitants containing three and one-half (which has been ascertained by actual count heretotore, to be a correct basis for computation,) as the average number in each family, and at the same rate of increase as the city is rapidly developing, Des Moines will have a population of at least 45,000 before the

Thanks to all who have in any way encouraged the enterprise, especially those who have so liberally supported us with their subscriptions and advertisments, to whom we return our best wishes and feel satisfied that the benefits which will accrue to each will repay them many times by an increase in trade.

yeat 1886 shall have closed.

THE PUBLISHERS.

MANUFACTURER OF

### Parlor, Dining, Bedroom Office Furniture

THE LARGEST STOCK IN IOWA.

### POLK COUNTY

EARLY HISTORY—POPULATION—STIL AND PRODUCTIONS—FRINCPAL STREAMS—TIMBER—MINERAL RESOURCES—Erc.

One of the best counties in the State is that of Polk, which was a part of he dounty of Keokuk, previous to 1846, but in January of that year it was established as a separate county, and included nearly all of Powshick and Jasper counties, while several of the townships now delonging to Polk were not then included in it, and it was not until 1853 that the present poundaries of the county were established. Polk county was organized March 1, 1846; the seat of justice was located at Des Montes, and the first election was held April 6, 1846. It contains an area of 352,500 acres, ind had at that time a population of about three hundred. The surface of he county is gently undulating, and is beautifully diversified with imbered streams and open prairies. The alternation of forest and prairie, ill and vale, presents beautiful scenery in various portions of the county. The principal varieties of timber are oak, walnut, maple, elm, hickory, inn and wild cherry. Detached groves are located here and there broughout the county, which relieve and beautify the plaine The soil sarich, black loam, unsurpassed in fertility in any part of the country roducing abundant harvests to reward the labor of the farmer. The imosphere is dry and invigorating, and the climate is salubrious, and vell adapted to the growth of fruits both large and small which are projuced in abundance. The mineral resources are rich. Polk county is thated near the center of the great coal fields of Iowal and vast quantity jes of the best quality of bituminous coal are annually taken, from the nes within its limits. Of these mines there are between twenty five and tty now in operation, giving employment to about two thousand men. c measures chiefly worked are from three to eight feet in thickness. industry has attracted large amounts of capital, and with the everne easing demand, is yielding remunerative returns on the investment, nd gives a largely increased traffic to our railroads. Both limestone and andstone, as well as mineral paints, are found. Petter's clay is bund in abundance, also fire clay, and excellent clay suitable for the nanufacture of the finer grades of brick, sewer-pipe and terra cotta.

Through its midst flows the Des Moines River, with all its tributary sters, collected from Southern Minnesota, and from twenty-four counties f Central Lowa. Of these tributaries Beaver Creek, flowing through

parts of four counties, Raccoon River flowing through parts of eight counties, and North River, flowing through parts of five counties, at pour their waters into the Des Moines in Polk county, from the west. Four Mile Creek, having a branch on the east, rises in the northern part of the county, flows southward with a steady current, between well timbered banks, into the Des Moines, on its east side, at the southern border of the county. The Chicaqua (or Skunk) flows across the northeastern quarter of the county, and its banks are well supplied with timber. Indian creek with timbered banks, crosses the extreme northeastern part of the county Besides these, the eastern portion of the county is watered with other smaller streams, among which may be named Camp Creek, Mud Creek and Spring Creek. Through the northwestern part of the county Big Creek flows southwardly into the Des Moines. On its west side the latter receives Beaver Creek, a fine stream, along the banks of which are found some timber and abundance of coal. Passing southwardly we have Mott's Branch, Walnut Creek and Jordan's Run, all lively water courses. Next, through the southwestern portion of the county, flows the main Raccoon River, a large, clear and beautiful stream, with gravel and rock bottom

River, which comes through Warren county, and empties into the De Moines. Besides these water courses which we have particularly mentioned, and the larger of which contain fine fish of various kinds, there are countless little tributaries flowing through the prairies, from spring in all parts of the county.

Tracts of unimproved land can yet be purchased upon reasonable terms and the county is rapidly becoming populated by an enterprising class of the county is rapidly becoming populated by an enterprising class of the seat of government is located at Des Moines, and there are also several thriving towns and villages. The population of the county is

and swift current. It joins the Des Moines within the city, limits, and add liberally to the volume of waters thence to the Mississippi. Farther

east, on the extreme southern border of the county, we find the North

and the county is rapidly becoming populated by an enterprising class of farmers. The seat of government is located at Des Moines, and there are also several thriving towns and villages. The population of the county as given by the State census in June, 1885, was 51,907, but the rapid development of its agricultural and mineral resources, together with increased facilities in transportation, manufacturing and general business in its cities and towns, has led to a large increase in its population, which is now estimated at upwards of 58,000.

The public schools of the county are in the advance in all that pertains to the public schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the county are in the advance in all that pertains the second schools of the second schools of the county are in the advance in all that pertains the second schools of the second school

knowledge received here is important and forms one of the chief factor in our material prosperity. It is claimed, and justly, too, that the children of these schools have all the advantages which the public school system affords. Polk county is well provided with comfortable, commodications.

school houses, sufficiently numerous and convenient, and the teachers of the county are among the most thorough educators in the State. Much of the success of our county schools is due to fact that we have a county superintendent who is an educator of wide experience and advanced views, and under his direction the schools have become more systematized and efficient. The number of school houses in the county is one hundred and ifty-nine, and the number of teachers is about three hundred and seventy-five.

The county court house was erected in 1858, and at that time it was he largest and most magnificent structure of the kind in Iowa: At the present time, however, it has become too small to accommodate the business of this, the most populous county in the State, and must soon be replaced with a new and larger building better adapted to the requirements of the various departments of the county husiness. The poor of the county are well cared for, and provided with the comforts of a home, and with nedical attendance at the Polk County Infirmary and Farm, located about ix miles north of Des Moines. This farm contains two hundred and ighty acres of land, and is under excellent cultivation, and the entire reperty is valued at \$52,000. The inmates who are physically able to work, do so, either on the farm or about the buildings connected with it, fine three story brick house was erected for the accommodation of the isane of the county, where they receive careful attention and the best management. From the last report made to the County Auditor, we can that the condition of each department is excellent, and the management very satisfactory.

The roads and bridges of the county are under the supervision of the oard of Supervisors. The county treasury contains surplus funds suffient for several new bridges, and also for the improvement of our roads, hich are in as good condition as any county in the State.

The affairs of the county, financially and otherwise are in good control, and the officers are doing efficient service, and in all departments liave evidence that efficient trustworthy men have been called to adinister the offices of the county.

COUNTY OFFICERS.

Polk county is about the center of the best agricultural region of the State, as well as the center of wealth and population. There is very little waste land, the farms are in a high state of cultivation, while the ready market found at Des Moines for everything produced by the farmer, and the rich, remunerative yield from everything planted, are rapidly enriching the farming community. This county is in the best stock raising region, and some of the largest and best stock farms are here. The conditions of successful fruit growing are met, and central Iowa, including Polk county, has claimed the first prize at various State Fairs, white Polk county herself attained that honor at the Centennial Exhibition in 1876, the prize for the greatest and best exhibit of apples true to name, having been awarded to James Smith, whose name is an authority on horticultural topics, and whose extensive orchards lie just south of the city. All varieties of small fruits and vegetables succeed here, and the establishment of more large gardens with all the appliances for early market garden.

ing would be a profitable industry, as the home consumption is large and the advantages for shipment in every direction, unexcelled.

Mineral springs are found in various parts of the county, some of them near Des Moines, the analysis of whose waters proves them to contain excellent medical properties, and there is no doubt they will furnish a never failing supply of water. For these reasons a water cure established near these springs and conducted by the proper parties, would be a success. Many of our citizens have derived benefit from the use of these waters. The mineral resources of the county have proved highly attractive to parties from abroad. Bituminous coal is found in abundance in various parts of the county, equal in quality to that obtained in any portion of the country. Our coal companies have greatly multiplied in the past few years, and to-day we have some thirty-five mines operated, employing about two thousand five hundred workmen. This is one of our principal industries, and is of great advantage to our manufacturers.

CITY HALL, DES MOINES.

Any information with reference to the business or manifacturing interests, or inquiries from any one desiring a new business location, will receive prompt attention by addressing the secretary of the Des Moines Board of Trade.

### THE CITY OF DES MOINES.

THE GROWTH AND POPULATION—IMPROVEMENT AND GENERAL PROSPECITY—MANUFACTURING AND BUSINESS INTERESTS—STATISTICS OF MANUFACTURING AND BUSINESS—TRANSPORTATION FACILITIES—INDUCEMENTS
TO CAPITALISTS—SOCIAL, MORAL AND EDUCATIONAL ADVANTAGES—ATTRACTIONS AS A HOME, ETC., ETC.

There are scores of towns in the West which at one time were promising, and grew with wonderful rapidity, seeming for a time, destined to a career of commercial greatness, but which are now in a state of decline, having been built for speculation, and without solid basis, such as is furnished by natural resources, and such commercial advantages as are afforded by transportation, facilities, and a sufficient territory tributary to warrant the establishment of factories and wholesale houses. A town thus built without natural advantages to sustain it, must, sooner or later, come to a standstill. Des Moines is well located in every particular, admirably adapted for manufacturing and business of all kinds, and with our unexcelled transportation facilities, surrounded by a country whose soil is of wonderful fertilty, with a people intelligent, industrious and enterprising, we will continue to develope more rapidly in the future than in the past.

We can offer then to the business man every advantage, to the home seeker a pleasant and healthful location, and pledge him a cordial well-come from a liberal people, with all the social, educational and religious advantages to be desired. The supremacy of our city is assured, and with all her advantages of position and commercial and social conditions, with all her advantages of position and commercial and social conditions. Des Moines is destined to be one of the largest cities in the West. The foundation of our future greatness is laid, and our people have only to continue in the march of progress so well begun. The statistics of improvements, wholesale and manufacturing business during the past year are very satisfactory, and the outlook for the establishment of new industries during the year to come is most encouraging.

Few fealize the rapid advances being made in improvements, transportation facilities, trade commerce, manufacturing, mining and other industries, which are simply increasing in the same ratio as the country

tributary, and there is no city in the United States with a greater extent of rich and rapidly developing country surrounding it, as there is no city in the West with more advantages, and so few disadvantages. It will be well for capitalists and men of moderate means, to give attention to the attractions which this city offers them over any other in the West. Many inquiries are being received, and many are looking to this city as their future business location and permanent home, as Des Moines presents not only commercial advantages but a most desirable place of residence.

Near the center of the fair domain of Iowa is the city of Des Moines.

fitly chosen as the capital of our glorious commonwealth. It contains an area of twelve square miles, and the Des Moines and Raccoon Rivers spanned by nine handsome, substantial bridges six hundred feet long unite within the corporate limits of the city, and from the confluence of these rivers, on either side, stretches a beautiful plateau, skirted by bluffs rising by gentle acclivities on all sides, affording fine residence sites while the level portion is extensive enough to accommodate the business of a city many times its present population.

Des Moines is situated in the center of a marvelously productive State,

in the richest agricultural region of the world, and this farming land, which is the foundation of wealth, can never be removed. The advantages are, therefore, permanent, and its location in such a field, its distance from any overshadowing city—being 358 miles west of Chicago and 366 miles northwest of St. Louis—its unrivalled railroad system and the great natural advantages it has in its inexhaustible supplies of coal for cheap motive power, and also its two rivers with the milling power to turn thousands of wheels, indicate that it is marked by destiny as a future city of imperial power and rank.

The surrounding country is abundantly supplied with streams of the

purest water, upon the banks of which are found numerous varieties of valuable timber. Underlying the whole city and its surroundings are inexhaustible beds of coal. The Des Moines and Raccoon Rivers furnish a never failing water power, and clays and sands found in this vicinity are of superior quality for the manufacture of all articles from arenaceous or argillaceous compounds. Thus it is seen that Des Moines has every encouragement to make it a great manufacturing center. All persons, whether residents or those who visit Des Moines for purposes of observation, agree that it is superior to all other cities of Iowa, and this is true not

only as a place of residence, but for all branches of business as well.

As a place of residence with all the comforts and conveniencies which make a home pleasant and attractive or for business, wholesale or retail, manufacturing or otherwise, Des Moines, with its social, educational and

religious advantages, its healthful location, beautiful scenery, pure water, transportation facilities, cheap motive power for manufacturing purposes, and all those advantages which combine to make home a attractive or business prosperous and remunerative, presents a most inviting field to the capitulist, manufacturer; mechanic, or to those seeking new and pleasing location for a home. Des Moines is situated in a remarkably picturesque locality, and the view from the top of the new Capitol is beautiful beyond description, with hill and dale, river and forest, interspersed at intervals with farm houses and villages, lending an indescribable charm to the land-scape.

Among the several cities of Iowa rivaling each other in rapid growth and solidity. Des Moines now claims indisputable pre-eminence. This proud claim, however warmly contested heretoford by other localities is certainly based upon facts that may well-challenge careful attention from the traveler. Rarely, indeed, can he record possession of position and surroundings, by a city site, of natural advantages and attractions, excelling or equaling those so richly bestowed upon our city.

#### EARLY HISTORY.

The first survey of the town was made July 8, 1846, and included that portion bounded by the Des Moines River, Eighth, Locust and Elm streets, now known as the original town of Fort Des Moines. On the 22d of September, 1851, the citizens voted to have it incorporated as a town, and articles of incorporation were adopted October 5th of the same year. At the first election, which was held October 20, 1851, a charter was adopted, under which the town continued until 1853, when the Fourth General Assembly, by special act, provided for a new corporation.

In 1854 Des Moines was designated by act of the Legislature as the capital of the State and in 1857, an act was passed to incorporate as a city. In this year, also, a new State House having been built by some of the enterprising citizens and leased to the State at a nominal rent, the archives of the State were removed from Iowa City to the new capital. In 1860 the Legislature enacted a general incorporation law, and provided for the shandonment of their present charters by those cities which desired to dome under its provisions, and as the result of an election upon the question held in May, 1863, the city abandoned its charter, and became incorporated under the general law. The boundaries have been enlarged and many additions have been made from time to time until the city now includes a territory of four miles in length east and west, by two miles north and south, embracing the township of Des Moines on the west side and Lee on the east side of the Des Moines River, and containing a population to-day of about 10,000.

#### POPULATION AND GROWTH.

Moines, showing that the founders, when they fixed upon this location, designed by nature for the site of a great city, must have looked into the future, and caught a glimpse of the coming greatness of the country, while they recognized the importance of a location commanding the high-ways of the continent.

Since the census of 1880, the city of Des Moines has been known as the metropolis of Iowa, and to-day it is larger by many thousands than any other city in the State. The growth of Des Moines has been steady and rapid, as the following figures demonstrate, showing the steady advance of our city from a struggling village to its present metropolitan proportions, forming an interesting feature in a statistical review. In 1846 the town contained 127 inhabitants; in 1850, 502; 1855, 2,278; 1860, 3,965; 1865, 5,722; 1870, 12,035; 1875, 15,782; 1880, 22,696, in June, 1885, 35,500, and to-day we claim, including the adjoining suburban additions, a population of 40,000, and we doubt not the next United Statescensus will show our population to be at least 75,000. Thus the growth has been very satisfactory, while business blocks and residences have sprung up on every hand as if by magic, and it is doubtful if any city of the same population in the Union can present such an array of figures as those denoting the growth of Des Moines.

The progress made during the year 1885, is a matter of pride to our citizens. New factories and business houses were established in our midst, and trade in all departments was very prosperous. Numerous elegant and commodious buildings were erected, for business or residence, and thousands of strangers located in our city. The array of facts and figures relative to the progress of Des Moines, is astonishing, and our people scarcely realize the wondrous advance we are making toward the fore most rank among the cities of the Union. The feeling of pride will be shared by our citizens who have labored to make the city what it is, and who have advertised to the world our superior advantages, which have attracted the attention of the entire country, giving us a reputation for energy and business activity, and making Des Moines the theme of comment almost everywhere.

Our city is to-day the greatest railroad center, and we believe, is destined to become the greatest commercial and manufacturing city west of Chicago. The orders received by our manufacturers and wholesale merchants last year exceeded their capacity to meet the demand, and there is urgent need of largely increased facilities for trade, and present indica

tions warrant us in saying that more industries will be added to the business interests of the city, and our trade and commerce will be more widely extended during 1886. In proportion to the growth and prosperity in business circles, are the improvements in the residence portion of the city. Schools and colleges are enlarging, and in all departments of the city's life there is a steadily increasing development.

Des Moines is populated by as energetic, wide-awake, enterprising and thriving people as exist on the face of the globe. The city is remark ably healthy, having an invigorating atmosphere, which is one of the inducements to strangers to locate here for a permanent home. With its beautiful scenery, fine business blocks and handsome residences. Des Moines is becoming the most beautiful, as it is one of the most healthful cities in the West. Many are now looking to this city as their future business location and permanent home, as it presents not only commercial advantages, but a most desirable place of residence, having cultured and refined society and excellent moral and educational advantages. Our central location and our unrivaled railroad system, have contributed largely to our growth and prosperity. Inquiries are often received from different portions of the country by the secretary of our Board of Trace in regard to the advantages for manufacturing and various branches of business, and to the attractions of the city, as a home. The growth of the city has been rapid since the advent and opening of railroads, which converge here from every part of the State, making this the convenient market for a territory hundreds of miles in extent. It is plain to be seen that our milroads sustain a very important relation in an industrial way to our people, and contribute largely to the general prosperity.

One of the encouraging features in the growth of Des Moines during the past year has been the accession of men of capital, who, acquiring a competency, have removed from other cities and towns to make their nomes here, bringing a great deal of capital to be invested, which will stimulate manufacturing and other enterprises. In the matter of wholesaleing and manufacturing the growth has been marked and the significance of the figures cannot fail to attract the attention of the outside world to the advantages and solid character of our city as a commercial center. The steady, rapid growth in the volume of trade, the growing reliability of the commercial character of the business men of the city, as compared with many other places—all attest the solidity and guarantee our future prosperity, and we congratulate the enterprising people of Des Moines on the remarkable evidence of vigor the city has shown in the past ten years, and also on the still more flattering prospect for the future.

### IMPROVEMENTS AND GENERAL PROSPERITY.

	Public improvements		\$ 580,505
,	City improvements		 1,237,251
	Business houses and factories		 719,965
	Suburban additions	• • • • • • • • • • • • • • • • • • • •	 . 395,626
	Total improvements		. \$3,101,209

The improvements in the city have been so great during the past few years, that some of the business men themselves scarcely comprehend the aggregate. For the past five years, they make a fine showing and are as follows: 1880, \$1,844,039; 1881, \$2,250,000; 1882, \$2,862,765; 1883, \$3,860,572; 1884, \$3,502,416; and in 1885 the city has developed its material interests to a degree that must be most gratifying to all her citizens. Business blocks and residences have sprung up on every hand as if by magic. The suburbs of a year ago have become more closely allied with the central portion of the city, while the business parts have become more metropolitan.

The progress made during the past year has been very satisfactory. The improvements which have been made are extensive, and the business transactions very large. The records of the year show an era of great prosperity. The amount of the improvements and the business of the past year will doubtless prove a surprise to many of the citizens. In place of such a decrease, the total this year is almost as much as that of the year before. Architects and builders say that, taking into account the great decrease in the price of all building material, and the reduction in the price of labor, these improvements in 1885 must be as large in extent as those of 1884. It is an indisputable fact that, in all departments of business, there has been a steadily increasing development, due to an increase of facilities, and new and improved forms of procedure, which are being introduced to the convenience and assistance of mercantile operations. The wonderful advances which have been so characteristic of our city are attributable to the energy and enterprise of the people. In no section is there a greater element of industry than here manifested. Des Moines

takes men of energy and enterprise, which Des Moines has, to do that.

The city is growing in wealth and importance, and many strangers are coming within her borders daily. The business portion is rapidly solidifying, and on every hand is heard the constant music of the hammer and trowel, and rumors of numerous enterprises in the way of public buildings and factories are current in business circles. Everywhere trade is active and pushing. The streets are crowded with the products of com-

has no rival in Iowa in location and natural advantages. But Nature, lavishly as she may endow a location for a city, cannot make a city. It

merce and of our prairies. The wortways are overflowing with energetic, pushing people, who everywhere seem full of life and stir. Situated on the great lines of railway spanning the continent, one feels allied to the ardor and enthusiasm which flow along these great arteries of commerce. In proportion to the growth and prosperity in business circles, is the improvement in the residence portion of the city. Many imposing and elegant residences were built in 1885, while those of a smaller and less expensive class can be counted by hundreds, and with the extensive network of railroads centering in our city, together with our natural resources. the advan-

tages for the growth and prosperity of Des Moines are almost unlimited.

It is to be doubted if any city of the same population in the Union can present such an array of figures as those denoting the business and growth of Des Moines during 1885. The business of the city has grown so rapidly during the past few years that some of the business men themselves scarcely appreciate its aggregate.

The stranger visiting our city is surprised at the evidences of prosperity surrounding him here. New buildings are going up on all sides in both the business and residence parts of the city. Old houses are giving way to those of the first class—fine blocks taking the place of the mixed medley of store houses, the creation of earlier times and good in their day, and dwellings fast filling the unoccupied places.

There are reasons aside from its beautiful and healthy location, and its natural advantages of position on the through railway routes, and in a central part of the great Mississippi Valley, why Des Moines should so steadily have worked its way up from one of the smaller towns of Iowa to the metropolitan city of the State. Villages do not thus spring into cities merely from beauty of location, and amid the rivalry of many contesting points. No young city can make a record like that of Des Moines, of solid and rapid progress in bricks and mortar, and this being merely a continuation of past progress, without something equally solid on which to base its prosperity. Sharp business men, in seeking change from old to new fields, are not apt to be fascinated by mere beauty of locality, nor to invest their dollars where the interest may be only in pleasant surroundings, with no prospect of the city's becoming a commercial center. Many of the improvements this year have been in the outer portion or new residence parts of the city, so that in the progress of their erection the work has not been seen by the general public. Very few of the people of our city realize the great number of houses built here during the past year, from the fact that few have explored all portions of our corporate limits.

We seek to give in brief space, and in readable shape, such informa-

tion in regard to the condition of trade, commerce and manufactures as

may prove of interest and profit to the reader. We shall speak of the city as it is of its advantages and claims in a commercial point of view, its possession of unequalled facilities of transportation, its exhaustless supply of cheap coal and water power, and its present condition and immediate prospects. The statistics and all other data here given have been verified with much care, and can be relied upon.

The street railway, electric light, telephone and water companies have all made extensive improvements in order to meet the demands of the rapidly growing city. A fine number of good, solid business blocks have been added, showing most fully the confidence held in the future of the city by capitalists. Almost everywhere and in every department are evidences of vigor and growth, which betokens a most healthy city in every commercial sense. All this has been done during a season of general dullness everywhere, and which has had its effects, of course, on the business parts of this city. It is safe to predict that, with general prosperity next year, there will be a large increase over the building of this season.

There is no location presenting greater advantages for manufacturing and wholesale business, and no city has improved so rapidly in this direction, as well as in transportation facilities. All parts of the city have been prosperous during the last few months, and we learn from our architects and contractors and builders that the prospect is good for the erection of new factories, business blocks and residences in 1886, so that the indications for the year to come are most encouraging.

## TRANSPORTATION FACILITIES.

The prosperity and development of a city is largely dependent upon its facilities for transportation, and to our railroads is due more than to any other single agency the present prosperity of Des Moines. The attractions which our city presents to enterprise, capital and skilled labor, with all her natural elements of productive wealth, have been developed to a great extent by her extensive system of railroads. August 29, 1866, the first train entered this city over the Des Moines Valley road, now the Keokuk & Des Moines branch of the C., R. I. & P. R. B. But to-day Des Moines has fourteeen roads, while several others are in contemplation, and this advance in her railroad interests indicates the confidence which capitalists entertain in regard to the future of our city. These lines are developing some of the richest agricultural regions of the State, and gather into Des Moines an immense and growing traffic. The facilities this system gives to wholesale interests, manufacturing, coal mining, lumber, stock and grain shipments, cannot now be fully estimated, ... it is to be taken for granted that our citizens appreciate the great benefits

derived from our railroads, as well as the fact that they have been indispensible agencies in the development of our city. The principal lines of road in the State, which are the great national lighways across the continent, nearly all reach Des Moines, by main or connecting lines, and are among the best equipped in the country, as regards both road beds and rolling stock.

Des Moines has for years been the railroad center for the Northwest and the doorway through which the western and eastern travelers pass in traversing the continent. In fact, so numerous are her roads that traverse all points of the compasse that it may be said that she is ribbed with steel. Thus the business man can see at a glance that at this point he would enjoy every advantage that accrues from an unexcelled transportation, which gives him the great West for a market and places the markets of the east at his door.

The question of cheaper transportation is now engrossing the minds of our citizens, and the people throughout the State, and we expect from the agitation of the question, better rates. A largely increased volume of traffic, and the construction of new lines into our city from every direction, produces competition, which in our opinion, is the most successful agency in adjusting the differences which arise, and in securing lower and equitable bases of rates.

What is most desired just at present by our wholesale merchants and manufacturers, is a little better rates, which we have reason to believe they will soon receive, and which will enable them to compete more successfully with Chicago and other cities. Situated as we are, between the commercial centers of the east and the markets of the great Northwest, we are brought into direct competition, and it is not to be wondered at that we should be looked upon with jealousy, as a rising commercial center, by those cities which realize that ere long the trade they now have may be diverted from them to Des Moines, when we secure such rates as will enable our merchants and manufacturers to handle the goods at the same prices. Everything is most encouraging that Des Moines will maintain her reputation as the best trading point west of Chicago:

# RAILROADS OF DES MOINES.

What may be said of one applies to all the fourteen lines of road centering here, that they have done much to aid in developing our city, and in building up our business and manufacturing interests.

CHICAGO, ROCK ISLAND AND PACIFIC.

This road entered Des Moines in September, 1867, and is one of the great trunk lines extending across Iowa, and connecting at Council Bluffs

with the Union Pacific. The growth of business and commercial interests in the west has made this road to rank among the first in the country. Their business during the past year shows an increase which has been advantageous not only to Des Moines but to the entire State. They have made many improvements in their road bed, and in the extension of their road in various branches through the State. The road is equipped with all those essentials which pertain to first-class accommodations, and the management gives evidence of the highest ability. The officers are, R. R. Cable, Chicago, general manager; A. Kimball, Chicago, general superintendent; H. F. Royce, Davenport, assistant general superindendent; E. St. John, Chicago, general passenger agent; W. M. Sage, Chicago, general freight agent; John Givin, Des Moines, superintendent Iowa division; W. K. Lucas, Des Moines, local freight and ticket agent.

KEOKUK AND DES MOINES.

This is one of the important north and south lines of the State, and was the first road built to Des Moines, entering the city in August, 1866, being then known as the Des Moines Valley road. It is now one of the principal branches of the C., R. I. & P. R. R., has been put in the best condition, and is a road of much importance to Des Moines.

DES MOINES, INDIANOLA AND MISSOURI.

This is a branch of the Rock Island; extending south from Des Moines, and is an important feeder to that road. It is probable that this line will be extended southward at no distant day, as important towns in northern Missouri are looking to a connection with Des Moines via this route.

DES MOINES, WINTERSET AND SOUTHWESTERN.

This is also a branch of the C., R. I. & P. R. R., and active measures are now in progress for the extension of this road southward to a connection with the railway system of Missouri. Its business during the past year has been great, for the extent of the line, and its advantage to Des Moines is highly appreciated by our citizens.

CHICAGO, BURLINGTON AND QUINCY

This was the first road which crossed the Mississippi river at Burlington, and is one of the great trunk lines of Iowa, as well as one of the wealthiest corporations of the west, and to-day it is unexcelled by any railroad in the world for general excellence, quantity and quality of equipment, and everything necessary for the comfort and convenience of its patrons. The line is a popular one and will always be a competing road

with any and all lines entering Des Moines, giving us direct communication with St. Louis as well as Chicago. The officers are as follows: C. H. Perkins, Burlington, president; T. J. Potter, Chicago, general manager; Perceval Lowell, Chicago, general passenger agent; E. P., Ripley, Chicago, general freight agent; Alf. Wingate, general agent, Des Moines.

DES MOINES, CHARITON AND KARSAS GITY.

This is a branch of the C. B. & Q. R. R., and extends from Des Moines via Chariton to St. Joseph and Kansas City. It is the shortest and most direct route from Des Moines to Kansas City. The line is well equipped and quick time made. Sleepers are attached to trains on this line, and run through.

CHICAGO AND NORTHWESTERN.

Des Moines is fortunate in this addition to her railway facilities, and this road is an active and powerful competitor for eastern and western bound passenger and freight business. It was the first of the three great trunk lines to extend its road across the State, and to connect with the Union Pacific at Council Bluffs. It has contributed also to the prosperity of our city, giving our merchants the advantage of another competing eastern route. It is noted for the speed and comfort which it secures to its patrons, is under able and energetic management, and is constantly extending its field of operation. The officers are, Marvin Hughitt, Chicago, general manager; W. S. Stennett, Chicago, assistant general manager; C. C. Wheeler, Chicago, general superintendent; R. S. Hair, Chicago, general passengen agent; W. W. Chamberlain, general agent,

DES MOINES AND FORT DODGE

Des Moines.

This road is an important factor in the railroad system of the State. From Des Moines, its southeastern terminus, it traverses the State in a northwesterly direction to Ruthven, on the Iowa and Dakota division of Chicago, Milwauked & St. Paul Railway, and it is expected that at an early day it will be extended from Ruthven, via Okoboji and Spirit Lakes, to the Minnesota State line. The Des Moines & Fort Dodge, in connection with the Minneapolis & St. Paul, forms a direct through line between Des Moines, Minneapolis, St. Paul, and the great lumber districts of the north, connecting with or crossing all of the important east and west trunk lifes of the State and passing through the great corn and stock raising belt of the State, it gives its patrons the benefit of all the principal markets of the country for lumber, grain and live stock. The famous Angus coal

fields are located on this line. Business men desiring a location will find many advantages embraced in the territory traversed by the Des Moines & Fort Dodge railroad. The officers are, C. N. Gilmore, Des Moines, superintendent; G. W. Ogilvie, Des Moines, general freight and passen ger agent; William Musson, ocal freight and ticket agent, Des Moines.

WABASH ST. LOUIS AND PACIFIC.

Only those persons who have given the subject careful study, can realize the importance of this road to Des Moines, not only giving us a shorter and cheaper outlet to the seaboard for our products, but also another direct and through line to St. Louis, New York and Chicago. This new outlet of transportation opens to our trade a new field of operation for our manufacturers and business men. The company has 3,482 miles of road, 382 miles being in Iowa. The officers are, A. A. Talmadge,

St. Louis, general manager; F. Chandler, St. Louis, general passenger agent; M. Knight, St. Louis, general freight agent; C. F. Meek, Des

Moines, division superintendent; L. M. Martin, general agent, De Moines.

DES MOINES AND NORTHWESTERN.

This is a part of the great Wabash system, extending from Des Moine.

This is a part of the great Wabash system, extending from Des Moines into the rich agricultural region northwest of this point through the counties of northwestern Iowa, where it is cordially welcomed as a valuable accessory to the development of that portion of the State. It is being rapidly extended into the great wheat-growing regions of Minnesota and Dakota.

ST. LOUIS, DES MOINES AND NORTHERN.

This is another branch of the Wabash line, extending north to Boone, and it is proposed to extend this line through northern Iowa and Minne sota to St. Paul. This will give a direct line from St. Louis to St. Paul via Des Moines, by means of the Wabash.

# THE WISCONSIN, IOWA AND NEBRASKA.

This gives direct communication between Des Moines and the north. eastern portion of Iowa, and to Chicago via the Chicago, Milwaukee and St. Paul, and we understand it is the intention of the company to build the line from this city southwest to St. Joseph and Kansas City, giving us another important line southwest as well as northwest.

DES MOINES, OSCEOLA AND SOUTHERN.

This road opens to us a field of rich territory and adds largely to the aggregate value of our network of railways. It is anticipated that this line will extend southwest to St. Joseph and Kansas City, giving us an

other important southwestern connection. The road is under good management, and ere long will be made broad guage, which will add largely to our transportation facilities. The officers are, E. R. Mason, receiver at Des Moines; N. T. Jones, local freight and ticket agent.

CHICAGO, MILWAUKEE AND ST. PAUL

This company, which we believe should have built their main line into Des Moines before this date, changed their route running north of this city directly west between the C., R. I. & P. R. R. and C. & N. W., but we have been informed that they intend to build a branch into Des Moines at an early date. At present their trains come into the city over the track of another company. From the importance of this road of connection with the network of roads in this city, and of securing a southwestern outlet, we feel reasonably sure of this road the present year, and we hope it may be built. This connection with the markets of Milwaukee and St. Paul is of great benefit to Des Moines. The officers are, Roswell Miller, Milwaukee, general manager; J. T. Clarke, Milwaukee, general superintendent; A. V. H. Carpenter, Milwaukee, general passenger agent; A. C. Bird, Milwaukee, general freight agent; John Thompson, jr., Des Moines, local freight and ticket agent.

#### MINNEAPOLIS AND ST. LOUIS.

This is another road connecting Central Iowa with Minneapolis and St. Paul, and the lumber regions of the north. One of the principal objects in the building of this road was to reach the rich coal fields in this section, and to build a road from Minneapolis, through Minnesota and Iowa, to both St. Louis and Kansas City. The line south has not yet been definitely located. The trains of this road come into the city at present over the line of another company. The officers are, R. R. Cable, Chicago, president; T. E. Clarke, Minneapolis, superintendent; S. F. Boyd, Minneapolis, general passenger and ticket agent; J. A. Hanley, Milwaukee, general freight agent; William Musson, local freight and ticket agent.

# RAILROADS IN PROSPECT.

Already Des Moines has railroad communication with every county in the State, and direct lines running into Nebraska, Dakota, Minnesota, Missouri and Kansas, with all of which States it has a large and rapidly growing traffic, and every line projected either north, south, east or west, sendeavoring to reach Iowa's metropolis. We believe that the year 1886 pour which we are just entering, will show even greater improvements in allroad building than 1885, which may be enumerated prospectively as follows:

west.

The changing of one at least and perhaps two of the three narrow gunge railroads that are now here into standard guage, and with this the completion of another line between Des Moines and Minneapolis and St. Paul. The entrance of the Chicago, Milwankee & St. Paul Road, and the investment by it of money in improvements here-giving us the fifth of the five great trunk lines of the West. The building of the Minneapolis and St. Louis Road into Des Moines, and its extension to the great coal fields near the city. The building of another Diagonal Road into Des Moines from the northwest admitting the trade of this city directly to a dozen counties now not tributary to it. The advent of the Central Railroad of Iowa, either by its own line, or by a trackage arrangement over some of the lines we now have. A standard guage railway from Des Moines to Kansas City and St. Joseph, thus admitting Des Moines directly to the railway system of the southwest. Everything is to be made ready for the widening, and for the building of the extension to St. Joseph and Kansas City.

We learn that the prospects of this road are good, and that the line has been located from La Crosse as far southwest as Ackley, and thus definitely determined. Engineers have been looking for the best route from Ackley to Des Moines, which will undoubtedly be the end of the second division. Leaving Des Moines, a will take a direct diagonal course to St. Joseph, Mo. This will be another important iron arm, and from the conversation we have had with the men connected with the project we believe the road will be built.

LA CROSSE, TOWA AND SOUTHWESTERN.

#### MINNESOTA, IOWA AND SOUTHWESTERN.

A company has been organized and incorporated under the laws of Iowa and Minnesota for the purpose of building a railroad from LaCrescent, Minn., through to a connection at Des Moines with a proposed line to Kansas City, and thus gain a through line, from the Mississippi to the Missouri river, intersecting this State from northeast to southwest. This line will connect the great lumber producing regions of Wisconsin with the Iowa, coal fields, and also the stock raising districts of Kansas and the south-

#### TOLEDO, OSKALOOSA AND WESTERN,

Is the name of a new corporation, proposing to build a line through the southern portion of Iowa. Surveys are being made between the C. B. & Q. and C., R. I. & P. lines. Des Moines will be reached, and west of this point there will be two branches, one to Council Bluffs and the other to Kansas City.

#### BURLINGTON, OSKALOOSA AND DES MOINES.

We understand there are three rontes under discussion. One is to Newton and on Northwest, another is by way of Peoria and on northwest, crossing the C., R. I. & P. at Colfax and the last one is through Pella. The narrow gauge can compete successfully with the standard gauge roads and it will pay. Des Moines is at present the objective point, but it is expected to be extended soon in the direction of Sioux City, giving us a diagonal through the State from coutheast to northwest.

#### DES MOINES AND SIOUX CITY.

This company proposes to build the railroad from Des Moines to Sioux City this year—the survey for which is to be made immediately. This will give us direct communication with the great wheat raising districts of Dakota and the northwest.

# FAST FREIGHT LINES.

Five lines have established agencies in Des Moines, the Star Union, the Red Line Transit, the Merchants Dispatch, the Baltimore & Ohio, and the Globe Line. These lines contract for freight to be delivered to New York, Boston, Philadelphia, Baltimore, Albany, and the principal dastern cities of the United States and all European points. They ship all perishable goods, such as butter, eggs, fruit, poultry &c., in superior refrigerator cars. The question of transportation and of the quickest and cheapest routes, are and always will be of primary importance in connection with successful business. These agencies afford increased facilities for carrying, and impart additional vigor to trade. These lines are represented in this city by gentlemen of enterprise and recognized ability in business management.

# ANOTHER RAILROAD

The Kansas City, Des Moines & St. Paul railway, has been organized for the purpose of constructing and operating a railroad, from Des Moines to Kansas City. The new corporation has also in view acquiring possession of the rights, interests and franchises of the Des Moines. Osceola & Southern tailway, as they now exist, including all improvements, enlargements, exensions and additions which may thereafter be made, and all property which is now owned, including its locomotives, cars and other equipment, and to construct an extension of the present line from the southern terminus, or some point adjacent, to Kansas City; and also to construct an additional extension from near the southern terminus to St. Louis. The amount of capital stock is placed at \$7,000,000. The provisional directors, who shall hold office until the annual meeting of the corporation in

1887, or until their successors are duly chosen, are J. S. Clarkson, F. M. Gilbert, C. F. Meek, J. S. Runnells, W. T. Alexander, E. A. Mason and Foshay Walker.

MANUFACTURING INTERESTS

Des Moines is especially calculated for a great manufacturing center. Here fuel is cheap with abundance of coal and wood, and we have good water power which, if utilized, would turn thousands of wheels. Imong the many cities and towns of this great State having excellent advantages, and which are endeavoring to induce manufacturers and capitalists to locate in their midst, is Des Moines, and we claim that there is no city in Iowa which can offer to the manufacturer so many natural and acquired advantages.

Those locking for new locations generally visit different points which

Those looking for new locations generally visit different points which offer inducements, and the questions which present themselves to the wide-awake business man are, what are the facilities for securing the raw material and for shipping the manufactured product, and what is the extent of territory tributary from which trade naturally comes? In reply to these questions you have but to consider our superior transportation facilities in the many railroads reaching out in every direction; also, cheap fuel, good water power, cheap lands for the location of factories, or for residences for operatives, healthy climate, low price of living, and building material as cheap as any place in the West.

All articles of food and provisions are in the market at greatly reduced rates, in comparison with eastern markets. The success of the factories already established and the rapid settlement of the adjacent country, are warrants for the establishment of many more. Our factories are shipping all over the world, as our goods are ordered in large quantities from all parts of the country. Manufacturing lies at the foundation of industrial life in all towns that flourish. It means a manufacturing population which would otherwise be elsewhere—an aggregation of people in cities and These people are to be fed. They want precisely what the farmer has to sell; they provide him the very market he desires, and either directly or indirectly benefit all classes. Our broad acres of cheap lands give us a great surplus of agricultural and meat products, and our laborsaying machinery and the skill and ingenuity of our artisans, enable us to increase our manufactured products and reduce the cost, to successfully compete in quality, quantity, and price with the old established factories of Europe

We are pleased to notice the progress of our home manufacturing, and our people appreciate the value and importance of this great interest. New factories are springing up and the old, ones are increasing their

capacity and works to meet the demand. Our great agricultural resources make this a most prefitable field for manufacturing. Situated in the center of the State, is one of the richest agricultural regions of the world, where is found an inexhaustible supply of the best coal; even within the limits of the city, as tine a water power as there is in the country, large bodies of timber along our main water courses, convenient of access to the city, and suitable for manufacturing purposes or for fuel; and having rail-roads leading east, west, north and south, with intermediate lines in process of construction and in contemplation, our city is the place to which manufacturers should come, as we have so many advantages which assure success.

It is no exaggeration to state that there is now no city in the West which has better advantages for manufacturing, and few as good, but there are yet many open fields of enterprise untaken. The city has grown so fast and developed so rapidly in its railroad system, that, while it has advanced remarkably in manufacturing, not nearly all the good opportunities have been taken.

Iowa has attained to a proud and enviable position in the list of agricultural States. Generous as our soil is, in yielding a bounteous wealth at the touch of the plow, it repays the farmer no more liberally for his labor than the manufacturer would be rewarded for his, if he would but embrace the opportunity afforded by the superior location and resources of Des Moines.

BUBINESS AND COMMERCIAL INTERESTS.

Iowa is a most inviting field for capital. It is more inviting, presents more advantages to capitalists, than the business men of the country have yet been brought to discern. Our rich fields prove to capitalists, that here are superior inducements for investment in various branches of wholesale business, as well as manufacturing.

Next to our manufacturing interests, the wholesale business is most important to the commercial growth of the city, and that Des Moines has grown into prominence as one of the leading commercial cities of the West, is largely due to her wholesale trade. As a business center, no city in the State can compare with her, as evidenced in the stattistics of business for 1885, when compared with other cities of Iowa. The business directory of Des Moines shows that she also has nore wholesale houses than any other city of Iowa. Cet there is still room for others in most lines, as well as for capitalists, manufacturers and skilled workmen. The excellent facilities for the distribution of merchandise in every direction make this a desirable place for the jobber, as well as the manufacturer

The leading branches business are are represented by first-class houses, which carry stocks equal to any west of Chicago, and there is hardly a special branch of busines not represented by good firms. The large and varied stocks carried here have the natural tendency to limit those in the neighboring towns to the ordinary articles used by the household, giving the merchants exclusive control of the trade in the finer and more costly lines. People will frade, as a general thing, where they can find the largest stocks, and where there is most competition. For these, and other reasons, the mercantile interests of Des Moines are increasing at a ratio much greater than the natural increase of the population.

To single out and dwell upon every advantage that this city offers to

the wholesale merchant who is in search of a location would fatigue the readers, and we shall only notice the more important.

The capitalist must have positive knowledge of the advantages of the location, before he can be induced to establish a business in any locality.

location, before he can be induced to establish a business in any locality. Convinced of these advantages, all doubt is removed and his enterprise becomes permanent.

If he selects Des Moines, he will be surrounded by one of the best, if

not the best, agricultural State in the Union. Her fertile fields with a rich, luxurian growth of golden grain stretching out on all sides, buys the new enterprise and fills its owner with expectation that not only causes him to hope for great things, but to harrise that energy and push so necessary to the success of all business.

The immense trade that centers here is supported by the country for

The immense trade that centers here is supported by the country for hundreds of miles in extent, reaching out into the territories beyond. With the rapid growth which Des Moines has made in the past few years, and with the many iron arms extending in almost every direction, reaching out for the trade not only of Iowa, but of the entire Northwest, we must say, our city is one of the best points in the country for the location of wholesale houses of all kintls.

There has never been a period in the history of Des Moines when business men in such numbers have come within our borders, many establishing large industries, as during the past five years.

Des Moines is acknowledged to be one of the best retail cities in the

West, and the business of the past year, estimated by those who are in a position to get at facts from which to make a careful and fairly accurate conclusion, is placed at twenty million dollars. The great increase in population, the three thousand five hundred workmen who filt our coal mines, shops, mills and factories, nearly all of whom receive constant employment at good wages; the unsurpassed agricultural territory adjacent to the city on all sides, thickly settled with well-to-do farmers, and the

vast amount of trade that comes from the hundreds of prosperous towns which dot the railway lines in every direction from the city, fall combine to give to Des Moines its deserved reputation of being the best retail point in this section of the West.

We give the statistics of the wholesale business of the city for the past year. In the wholesale trade some of the houses report that they really had more business last year than the year before, but that owing to the degreese in the value goods, their reports are not so great. The wholesale dealer does not wish to give his competitor any insight into his business. This point was impressed on the compiler by almost every one in trade. It was in strict confidence that the figures were obtained, to be used not separately, but in aggregates, and to keep faith with those who have so kindly furnished us data, we are obliged to give the aggregates, as follows, and as these figures are especially indicative of present prosperity and future greatness of Des Moines as the commercial, jobbing and financial city of the State.

Any information with reference to the business or manufacturing interest, or inquiries from any one desiring a new home or business location, will receive prompt attention by addressing the secretary.

# BUSINESS STATISTICS 1885.

The figures given below which have been ascertained from a careful canvass, represent the amount of business done in wholesale and manufacturing during the year 1885;

DES MOINES TOUR	nna c	ND M	A MERA CONTINEDO LA COCOTA PORTO	NAT	
TAMO MOINING HOUD	15112 C	ווג עווי	ANTEACTURERS ASSOCIATION	11N -	
	_ : _ :	- 1			_

There is in this city a Jobbers and Manufacturers' Association for mutual interest, self-protection and the development of the business to sources of this city. The following persons are the officers: James Watt president; S. J. Craig, vice-president; L. Harbach, treasurer; W. W. Ains

worth, secretary and manager. Directors, W. W. Bently, C. C. Prouty, S. H. Hess, J. F. Rollins, H. B. Hedge. The organization embraces over fitty of the prominent business men of Des Moines.

DES MOINES BOARD OF TRAIR.

The Board has been an active agency in all important affairs of our city, and through its enterprise has been the means of securing to Des Moines many benefits. The association is composed of two hundred of our leading public spirited citizens, who have the best interests of the city at heart, and who will use every effort to advance the growth and prosperity of Iowa metropolis. The best evidence of the usefulness of this Board of Trade is in the fact that it is next to our city press, the principal cause of the increased spirit of enterprise among our citizens, and it affords us great pleasure to say that from all points we have the evidence that Des Moines has made great advances in population, manufacturing whole-sale trade, public and private improvements, during the past four years, which have never been equalled in any like period. Officers: George C. Baker, president, J. H. Windsor, 1st vice-president, S. A. Robertson, 2nd vice-president, Simon Casady, treasurer; J. P. Bushnell, secretary. Directors: George H. Maish, W. W. Witmer, J. A. Ankeney, C. Youngerman, T. S. Wright, S. B. Suttle.

REAL ESTATE.

City property is in good demand, especially for business or manufacturing purposes, which can be obtained at reasonable rates and in desirable locations. Some of our real estate dealers are offering special inducements to parties desiring to establish factories, in some cases donating the grounds for this purpose, while others are offering land in most desirable localities, at very low rates. There are many inviting sites adjacent to our different railroads. The inducements offered by our city, in giving a remittance of taxes for five years, to factories employing a sufficient number of operatives, is worthy of special note.

With all the visible signs of prosperity, property is held at no speculative value. The capitalist, or manufacturer or mechanic coming here, will find property held at a healthy valuation, neither so low as to indicate an uncertain faith in the city's real prosperity or progress, nor so high that it may not continue increasing just as the city grows.

The first consideration is that of cheap land upon which to rear the buildings. In this Des Moines is fortunate, for she has an abundance of land that can be had at reasonable figures, soil that is free from quicks and, and well adapted to foundation building. There are peculiar inducements to investors to acquire property here now. It will increase in value very

rapidly and can now be had for prices low enough to afford profit. Money expended in lots in the Lowell of Iowa will return ere long with good profit.

There are numberless inviting sites for residences, surrounded by native groves, and overlooking the adjacent country and the business portion of the city, and residence lots, though in good demand, can be obtained at reasonable rates, as well as lots for business or manufacturing purposes.

The question of taxation is one which always enters into the consideration of location. Our taxes are as low as any other first-class city in the west, being on real estate, on the cash valuation, 2.2 per cent. Our municipal affairs are managed with prudence, and our citizens encourage a judicious and economical management in expenditures, so far as is consistent with the best interests of a rapidly growing and prosperous city. It is no idle boast to say that no city in the northwest can offer more or better inducements to investment seekers, than Des Moines, as her population is destined to double within, the next few years, and the outlying property will be rapidly brought within the business centre.

The year 1885 has been marked by considerable activity in real estate; many sales have been made and better prices paid than during any previous year in the history of the city. Nor can this be attributed to a mere temporal "boom," but to the natural result of our largely increasing population and consequent demand for dwelling and business property. Those persons who imagine that real estate is inflated in value, are as badly mistaken now as they have been in the past; for, with some few exceptions property is held and offered at very reasonable prices, and it is an absolute fact that in no city in the west can the poor man find it so easy to secure a home of his own as here. We are positive, in the belief that the close of the present year will witness a large increase, both in

There are five first-class loan and building associations in Des Moines, all of which have rendered valuable assistance in building up our city. The object of these organizations is to aid any of their stockholders in their efforts to secure a home, by lending money to them at a very low rate of interest, to be paid in weekly, monthly or yearly installments. The money is loaned only to stockholders. There are hundreds in Des Moines to-day dwelling in their own homes, who, but for these institutions, might not be thus fortunate.

COAL

While the coal fields of Iowa cover an area of about 16,000 square miles, that portion of the territory about fifty miles wide, extending along

the Des Moines River on both sides, from a short distance above Ft. Dodge to Keokuk in the southeastern corner of the State, and comprising about 6,000 square miles, is said to be the best and most accessible. The coal beds of Iowa are separated into what is known as Upper, Middle and Lower measures, the latter producing the best coal in greater abundance, the veins being from four to seven feet in thickness. The coal fields in in Iowa have a general "dip" or incline to the southwest, and to the south and west of the territory mentioned, the lower measure is so far below the surface as to be profitably mined only by deep shafting. Des Moines is amated in the midst of the best coal producing area in Iowa, and mining constitutes one of its principal industries. It is said that the presence of coal in this vicinity was first noticed by the soldiers who built and occupied the fort, and that the blacksmith shops in connection with the garrison, were supplied with coal from the outcroppings along the river, but nothing like systematic mining was carried on until about 1865, when companies commenced prospecting, with a view to engaging in the business of mining on a large scale. Now there are twenty-live companies whose mines are nearly all located in or adjacent to the city, doing business in Des Moines at the present time. The capital invested in these mines amounts to about a million dollars, and they give employment to apwards of two thousand men. Besides the home consumption, large quantities are slipped abroad. The coal is the best quality of bituminous, and can be obtained at from \$1.50 to \$2.50 per ton at retail, while a grade of fine coal suitable for manufacturing purposes can be bought much cheaper.

WATER POWER

The first step for Des Moines to take toward becoming an important manufacturing town is to provide cheap water power for the operation of machinery.

Sections 1236 to 1240 of the Code of 1873 (chapter 79, laws of 1872), confer the most ample power upon water power improvement companies. They have the same power as railroad companies to condemn land for the ight of way for canals, water-ways, buildings, and other necessary uses. Ses Moines holds the scepter for the best water power in the State. The blacid Des Moines flows through the middle of the city, giving her an dest and west side, while the rapid Coon whirls around a part of her restern and southern borders and empties into the Des Moines, thus furnishing the very best of water power within a stone's throw of many of our railway depots. About twenty years ago, before Des Moines was a city. Edwin Hall obtained by grant from the Legislature, convened at lowa City, and by license from the Commissioners of Polk county, the

franchise which gives the present water power on the Des Moines River within the limits of the city, a power which should to-day keep in motion manufacturing enterprises sufficient to give employment to many thousands and profitable investment for unlimited capital.

A dam six hundred feet long having a fall of eight feet was built across the Des Moines River, giving a power sufficient to keep in motion large manufacturing establishments employing thousands of operatives and to day the only use made of this power is in the operation of a flouring mill at the west end of the dam.

The east side of the river having the same power is now idle, and presents a rare opportunity to locate manufacturing enterprises; and we It is believed by our most have here so many undeveloped resources. competent engineers that by raising the dam one or two feet, a fall can be secured that will give power to operate almost unlimited machinery. This can be done under charter. It would be an easy thing for a competent engineer to take the water from the dam down both banks of the river Intelligent men have estimated that the dam can be raised, all the neces sary right of way secured, and the two water-ways constructed from the dam to the mouth of the Raccoon River for less than \$40,000, capable of running all the machinery that requires power within reach, that would pay a reasonable rent for the use of the water. A water power company could rent the use of its water power to every such factory at from one-half to one-eighth of what steam power costs, to say nothing of the manufact turers's original capital that is swallowed up in the purchase of engines While this is a feasible plan, and apparently the most practical ble for securing the desired water power, we must not ignore the Raccon River, which flows at a rapid rate, is soft water, and can readily be made of great utility in manufacturing. At a very small outlay either of these rivers could be so dammed as to furnish a sufficiency of power to operate all the machinery of the city.

CLAYS

The clays of this vicinity add no small value to the industries of our city, as evidenced by our extensive brick yards, and the buildings of our city, small and great, demonstrate their excellence and stability. No only is clay for the manufacture of common brick abundant, but the finest quality of white or 'Milwaukee' brick may be made in our vicinity. Fire clay abounds in connection with our coal deposits, as well as the best and most valuable of coal measure clays—potters' clay—which is found of superior quality, and the products of our extensive potteries find markets hundreds of miles away. We have the largest drain tile works in the

tate, and their product is greatly appreciated by farmers in every direction, and this is also true of our artificial stone and sewerage pipe manufacture. Clays have been tested which proved unexcelled for the manufacture, of mineral paints. It is a well-known geological fact that where situminous coal exists in any quantity there is almost sure to be found in the upper strata, near the surface, excellent clay, suitable for the tiner adds of brick and terra cotta manufacture. Actual experiment has sown that all around our city, near the surface of the ground, there exists in inexhaustible supply of this clay. Parties who have made a study of the ceramic arts for years, in the interest of terra cetta manufacture, and have visited the leading establishments of Europe, where clay is manipulated for manufacturing purposes, say that our clays seem peculiarly fitted for this work, and tests prove them of a quality equal to the European clays, in some localities imported to manufacture the finer grades of pressed brick, terra cotta and fancy pottery wares. There is no article that can be manufactured in our city which will do more to beautify it, and at the same time yield a better profit for the capital, skill and energy expended, than the manufacture of the finer grades of brick, terra cotta pottery and the other ceramic arts; and there is no reason why the Des Moines of the future should not be as noted for its pressed brick as is Philadelphia and Baltimore.

#### SANDS.

An extensive deposit of silicious sand of excellent quality exists near Des Moines, which has been proven, by actual test, capable of making glass of superior whiteness and brilliancy, equal to that made from sand brought from other States. The fact that the quality is unexcelled and the quantity inexhaustible should be sufficient inducement for the establishment of a large glass factory here, in the near future, which we believe will be an accomplished fact before another year, from the correspondence we have had with parties contemplating a change of location. The sands ying in bars along our two rivers are extensively used in the manufacture of artificial stone, and for building purposes.

#### diurches.

The churches of Des Moines number forty-four, many of which are trong in members, wealth and influence, and are divided as follow: Nine lethodist, five Presbyterian, five Baptist, three Congregational, two spiscopal, five Lutheran, three Catholic, two Christian, two Evangelical, wo Friends, two Jewish, one Unitarian, one United Brethren, one Latter Day Saints and one Disciples. Nearly all these churches have their own

houses of worship, many of them being fine, commodious buildings of great architectural beauty, whose interior finish and furnishings are refined and elegant.

# YOUNG MEN'S CHRISTIAN ASSOCIATION.

This is an association whose efforts for good are known and appreciated throughout the civilized world, and whose membership is numbered by hundreds of thousands. In Des Moines there exists a flourishing branch of this organization, numbering between two and three hundred members, which is in efficient working order and is accomplishing much good. It has a library and free reading room well supplied with paper and magazines, and frequent social and literary entertainments are given. Their rooms are always open for young men to visit, and to spend their evenings or leisure hours during the day, and assistance of any kind that can be furnished is cheerfully done.

# It is fortunate for Des Moines that the controling minds in the public

policy of the city have been in favor of liberal measures for increasing and perfecting her educational facilities, which are a matter of pride and

pleasure to our citizens, and with our three colleges, our excellent system of public schools, our commercial, law, medical, music and art schools, it would seem that one might obtain an education which would fit him for almost any department of business or professional life. Education is the corner stone upon which I own has built such a superstructure, as has inade her school system the admiration of the world, and in no portion of the State are the educational advantages so varied and complete as in our city. There has been a special endeavor on the part of our citizens of make the schools of Des Moines worthy the evident future of the city, and the success attained is a matter of gratification.

PUBLIC SCHOOLS.

There is probably no city in the west provided with a better or more complete system of public schools, or with more ample provision for its generous support than Des Moines. The city is divided into two independent districts, each having its own Board of Education, composed men of broad and liberal views, in pursuance of which they employ the best teachers at a liberal compensation, and as a result the public schools are conducted in a highly satisfactory manner.

Nothing will sooner attract the attention of the visitor to our citythan the commodious and elegant school buildings,—of which there are fifteen built with regard to architectural beauty, thus combining the ornamental

In the useful. There are one hundred and fourteen teachers employed, if the number of children of school age is over ten thousand, of whom senty-five per cent are in our public schools. The School Boards and the zens show a commendable spirit of zeal and liberality in the maintente of our public schools. For several years kindergartens have been sucsfully conducted in various parts of the city, and the system has grown favor until it has become securely established, and they are now taught several of our ward schools.

#### UNIVERSITY OF DES MOINES.

This is the oldest of our colleges, having been established under the spices of the Baptist denomination as early as 1866, and is located near the new Prospect Park, where buildings suitable for the purposes of the older have been erected. The curriculum of this school embraces a full oldern instruction; its corps of instructors is energetic and ambitious, and ally alive to the demands of the State and the age. The past year has been the most successful in its history, and the future of this college in its new cation is most encouraging.

#### CALLANAN GOLLEGE.

This institution owes its existence to the liberality of Mr. James Calnan, from whom it derives its name, and through whose generosity it as founded in 1880. It occupies central and beautiful yet somewhat tired grounds, admirably adapted for the purpose, and commanding one the most beautiful views about Des Moines. The course of instruction restricted to young ladies, of whom there are over one hundred in athematical, and is designed to give all needed mental discipline and the liture adapted to produce well-rounded and symmetrical womanhood. He school is the roughly christian, but undenominations.

The college building on Pleasant street has been specially designed arranged to secure every facility for convenient and varied educational ork, is heated throughout with steam and lighted by gas, and in its supment of furniture, apparatus, blackboards, and maps is amply and egantly furnished.

Several of the teachers reside in the building, and the whole is under mmediate supervision of the preceptress. The desire and aim of this mly home is to give to young ladies from abroad all the care and compatible can be had at their own homes.

It is the purpose and aim of the management of the College to build a school in the central metropolis of the West; that, for thoroughness

and breadth of culture, and for special advantages in those studies which directly tend to elevate and refine, shall not be surpassed by any similar institution in the East.

#### DRAKE UNIVERSITY.

This is the youngest of our colleges, and is under the auspices of the Christian denomination. It is located in a beautiful grove in the extrementation portion of the city, the college building is a handsome structure, and the college campus contains eight acres, on a slight known beautifully diversified with magnificent forest trees. The plan of the institution embraces literary, medical, law, business, theological, normal, at and musical courses of study. This school is on an excellent financial basis, and has about two hundred and twenty-five students. Large and commodious buildings, cheap boarding, home-like surroundings, moral and Christian influences, active literary societies, railroad connections with all sections of the state and other states, court sessions of all grades legislative assemblies—all secure to the student of Drake University ercellent advantages.

# PRIVATE SCHOOLS.

Besides our public schools, we have a number of private institution of learning, which are largely attended, and possess excellent school buildings centrally located.

# BUSINESS COLLEGES.

The two institutions here impart instruction in book-keeping, penmanship, business arithmetic and law, telegraphy, stenography, and those branches which especially prepare young men and women for active business life. The knowledge obtained in these schools is not only theoretical, but practical as well, fitting the student for the busy scenes of real life putting this knowledge to use as fast as it is acquired. Their graduates found in many of the business houses of the city, and throughout the northwest, are the best endorsement of the good work they are doing for the young men and women of the land. Another school but recently opened, is devoted exclusively to penmanship, which is taught in various

#### MUSIC SCHOOLS.

ment of the valuable accomplishment.

styles from the plain, neat and rapid script to the most claborate pen flourishing and drawing, and affords an excellent opportunity for the acquire.

The advantages offered by our music schools for the acquirements of a thorough musical education are unsurpassed in the west, and whether the student is desirous of obtaining a theoretical or practical knowledge of

music, instrumental or vocal, the instructors in these schools are fully competent to impart the information desired. We have among our teachers of music in Des Moines a few who are not surpassed as instructors in any part of the country, and who pursue a system of training admirably designed to the object for which it is designed. These institutions are all independent and accessible locations, and are largely attended by advanced by list, as well as those commencing the study of music.

#### LAW SCHOOLS.

The Iowa College of Law is located here. Des Moines cannot be excelled as a location for legal training. As the capital of the State, it affords the student rare advantages. The student has tree access to the state library, which contains about ten thousand volumes of law books alone, including the reports of all the States and many foreign countries complete, and is one of the fullest collections of legal text books in the West, ranking fifth among the law libraries of the United States. The sim of the faculty is to give thorough instruction, and the final examination is strict, requiring faithful work of the student in order to graduate.

There are three medical schools here, the Iowa College of Physicians and Surgeons, the Iowa Medical College, and the King Eclectic Medical College, which offer excellent advantages for the acquirement of a thorough medical education.

MEDICAL COLLEGES

# PUBLIC LIBRARIES

One of the most beneficial and complete sources of entertainment, progress and culture is afforded by the libraries of the city. Here we have our celebrated State Library, which ranks fifth in size and importance among the law libraries of the Union, the reports of the United States and soveral sets of the foreign reports being complete. The scientific, historical, fiction, biographical and record departments are also well filled, containing in all about forty thousand volumes, exclusive of pamphlets and manuscripts. We have also a well-selected city library, containing about five thousand volumes, in addition to which is kept a file of the leading monthly and weekly magazines, and our city publications, all of which are free to the use of the public, and the reading room is a favorite resort for many persons of studious habits. The State Arsenal contains the Record Library for Iowa, of the wars of the United States, which are for public reference.

# ACADEMY OF SCIENCES.

This was originally organized June 6, 1878, and re-organized, under

officials.

the name of "Iowa State Academy of Sciences," November 20, 1879, at which time it was incorporated. Its object was declared to be "the increase and diffusion of scientific knowledge, and, as contibutary thereto the collection and maintenance of a museum and library illustrating the different branches of natural science." Its officers consist of a president vice president, recording secretary, corresponding secretary, treasurer, curator and librarian, with a board of five directors. Regular monthly meetings are held for the transaction of business and the presentation and discussion of papers on scientific subjects. The membership is gradually increasing, and a growing interest appears to be manifested. The academy possesses a fair beginning for a museum and a library. Interesting publications by popular scientists have been given under its auspices. It hids fair to become one of the permanent institutions of Des Moines, and is worthy of the liberal patronage of her citizens.

# POST-OFFICE.

The United States Court House and Post-office is a fine structure built of Joliet stone, three stories and basement, at an expense of \$206,000, and is decupied by the post-office department, the United States Courts, and all United States officers residing here. This is noted as a model post-office in every detail, and although the amount of business transacted here is very large, yet so systematically and efficiently is the work of transmitting the mails conducted that it leaves no cause for complaint. The postal business of the city has increased so largely as to necessitate greater space, and for this purpose Congress has recently appropriated the sum of \$180-000 to enlarge and improve the building. Another story will be added, which will greatly improve its appearance, and other changes will be made which will add to the comfort and convenience of the post-office

The transactions of the post-office are a very fair index to the general business of a city, and the showing made in the annual report is certainly very flattering. The following figures of business done in the Des Moines post-office during the past year are taken from their annual report: Gross receipts, \$93,308.83. Expenses—salary \$3,300; clerk hire, \$9,895; free delivery, \$12,047.14; incidentals, rent, etc., \$229.15; total, \$25,471.29. Net revenue, \$67,837.54.

In order to arrive at some just estimate of the business done here as compared with that of Iowa towns, it might be well to mention some facts taken from the annual report made to the department at Washington by the second city in the State: The receipts for the year were \$40,979.31. In the Des Moines office, the receipts for the same time were \$93,308.83.

The receipts at Des Moines werd more than for both the second and third cities in the State combined as to the amount of business done. The the net revenue was more than \$26,000 in excess of both together as shown by shown by their annual reports.

It is a grand showing for Des Moines, and the percentage of expense to receipts makes it the most economically managed office in the State, if not in the West. There is but one other first-class office that is managed as economically as this, which speaks volumes for Mr. John Beckwith, the postmaster, and his assistant, Mr. W. L. Harlan.

#### NEWSPAPERS

The general character, appearance and professional rank of the newspapers of a city constitute a criterion by which to estimate its people, their intelligence and their prosperity.

In all the rapid advances made by Des Moines, nothing impresses the mind more than the wonderful progress in journalism, and the cininence attained by our newspapers, and the power which they have exerted in the growth of our city. They are always alive to the interests of Des Moines. The whole editorial staff are a wide-awake and enterprising fraternity. No other city in Iowa has as many newspapers and publications as Des Moines; and certainly in proportion and extent of circulation, no other city of the same population in the country can make a better exhibit. They are edited with ability, and with a just appreciation of the prominent position they occupy as public educators. The following are the principal papers:

State Register, daily and weekly; Des Moines Leader, daily and weekly; Iowa Capital, daily and weekly; Des Moines News, daily; Iowa Homestead, weekly; Journal of Commerce, weekly; Iowa Staats Anzeiger, weekly; Safurday Evening Mail, weekly; Persinger's Times, weekly; Plain Talk, weekly; Towa Tribune, weekly; Iowa Messenger, weekly; Northwestern Journal of Education, weekly; Christian Oracle, weekly; Million, weekly; Live Stock and Western Farm Journal, semi-monthly; American Real! Estate World, monthly; Eclectic Medical and Surgical Journal, monthly; National Illustrated Vindicator, monthly; Northwestern Library, monthly; Presto, monthly; Western Guardsman, monthly; Western Stock Raisers Journal, monthly; Western Trade, Review, monthly; and the Western Nowspaper Union auxiliary publishers of Iowa and other weekly papers.

#### BANKS

Des Moines has a solid financial status, and comparative statements rank us far in advance of any other city in the west, of the same

population, in number and amount of surplus deposits. A commercial city is always in a great degree dependent upon its banking facilities, and any one at all observant would naturally be impressed with the extent off the business of this city, by noticing the amount of capital possessed and the prosperity of the banking institutions; for the advance of business is probably more accurately demonstrated by the growth of the banking interest thun by any other standard that can be followed with equal precision. The exhibits of the Des Moines banks have proved this to be a greater financial center than many suppose. The banks of Des Moines draw from the principal mercantile and corporate institutions throughout western and northern Iowa, and furnish a safe deposit for the banks and merchants in the counties of central Iowa. Eastern exchange sold by Des Moines banks amounts to millions annually. The following are the banks of the cithu

Citizens' National; Iowa National; Des Moines National; Merchants' National; Valley National; Capital City; and the Des Moines, Polk County, and American Savings Banks. Besides these, there are several Loan and Trust Company, and Loan and Trust Company, New England Loan and Trust Company, Central Loan and Trust Company, Security Loan and Trust Company, and the Des Moines Loan and Trust Company.

# HOME INSURANCE COMPANIES.

Des Moines may well be styled the Hartford of the West, in the number of insurance companies established here. The position occupied by these companies is such that in describing the commercial, manufacturing and financial advantages of this city, it would be impossible to omit mention of these institutions, which have contributed so largely to the solvency and solidity of our mercantile enterprises, laffording that protection and security guaranteed only by the most reliable organizations of this character. These companies, including fire, lightning and tornado, and accident, have done much for Des Moines, and as their settlements have been promptly and liberally made, confidence on the part of the public has been established. The fire companies are as follows:

The Hawkeye, State, Des Moines, Monarch, Capital, Mill Owner's Mutual, Merchants and Bankers. The life companies are the Equitable Life of Iowa, Bankers' Life Association, Guaranty Life Association, Western Mutual Aid Society, Security Mutual Life Society, Farmers Mutual Benefit, and two live stock companies, viz: the National Mutual Live Stock Association and the Northwestern Farmers and Live Stock

Breaders Indemnity Association.

# SOCIETIES AND ORDERS.

The fraternal and benevolent societies usually found in large cities are well represented in Des Moines, there being numerous organizations of Masons, Old Fellows, Knights of Pythias, Legion of Honor, United Workmen, Modern Woodmen, Knights of Labor, Red Men, Druids, Grand Army of the Republic, and many others of minor importance, while in the temperance organizations there are the State Alliance, Good Templars, Citizen's League, Sons of Temperance, Temple of Honor, and Woman's Christian Temperance Union. The visitor from abroad, it matters not from what portion of the world he comes, may find among the various benevolent and social organizations in the city, some one to extend the hand of welcome, and express a fraternal interest in the stranger. These various societies and orders are numerous, and most of them are strong in numbers and influence. Many of them have departments of life insurance, thus constituting them nutual benefit associations.

HOTELS.

There is nothing which adds so much to the prestige of a city in the estimation of strangers, as first-class hotel accommodations. And the numerous and excellent hotels of Des Moines, a emoted for their excellence in all those essentials which pertain to first-class accommodations. The leading houses are furnished in elegant style, the cuisine is unexceptionable, while the locations, accessibility and general management have given them a reputation and popularity second to none in the state. The two principal hotels have been re-modeled, enlarged and re-furnished in the most thorough and complete manner, at a cost of more than \$100,000, thereby greatly increasing their facilities for the entertainment of the public. The most prominent houses are the Kirkwood, Aborn, Morgan, Gault, Sabin, Capital, International, Given, Miller, besides many smaller but comfortable and house-like houses of entertainment. Two large and elegant hotels are to be built during the coming season, one on each side of the river.

#### OPERA HOUSES.

During the last few years much has been done throughout the country in building and fitting up theatres and opera houses for the comfort and accommodation of the great mass of theatre-going people, and Des Moines, through the efforts of her public-spirited citizens, has kept pace with other cities in this respect, having three fine opera houses—the Grand, Foster's and Lewis' Opera House—with a combined seating capacity of about five thousand. They are admirably arranged for comfort and convenience,

special attention being paid to heating and ventilating, also to the means of exit in case of an emergency. They are ornamented with fine frescoes and turnished with upholstered opera chairs, beautiful scenery, ample for the production of any play, large and completely equipped stages, and every convenience of a thoroughly first-class place of amusement. The managers have exhibited an energy and ability in the character of the amusements presented to the public, which have placed these houses in the front rank of such establishments in the west.

# THE NEW CAPPOL.

The illustration of Iowa's new Capitol on another page, is an excellent representation of the building, which is a model of beauty throughout, comparing favorably with the finest buildings in the country, standing as a monument to the progress, thrift and industry of the people of the state. The building stands on an elevation of about one hundred and twenty feet above the Des Moines river, presenting an appearance magnificent in proportions, elegant in design and solid in construction. The massiveness of the structure is relieved by elegant domes at each of the four corners, while a larger one crowns the center of the edifice. Over the west entrance is the coat-of-arm's of Iowa, handsomely sculptured in solid stone. The central dome commands a beautiful and extensive view of the surrounding country.

The partitions are all of brick or other fire-proof material, and the floors are made with iron beams and brick arches with either an encaustic tile or wood covering. The rooms are all warmed with steam, with both direct and indirect radiation from a battery of seven boilers located in a building across the street on the north side, and the rooms are all ventilated by exhausting the air through air ducts built in the walls. The roof is an iron frame-work covered with porous terra cotta and slate laid in cement mortar. The corridor floors are all of encaustic tile laid in very rich patterns, and the wainscotings of the corridors and all the principal rooms of both office and second story are of domestic and foreign marbles, of which there are thirty-two varieties in the building.

The varieties of wood employed in the building are: Ash, Red Oak, White Oak, Black Walnut, Butternut, Chestnut, Cherry, Mahogany, Poplar, Yellow Pine, White Pine and Catalpa. The walls are elegantly decorated with frescoes, including some very fine figure work. The furniture is of the richest and most artistic patterns manufactured to order, and in harmony with the elegance and beauty of the building.

It is but justice to the gentlemen who have been in charge of this work, to state that the money appropriated from time to time, by the

general assembly, for the construction of the new Capitol, has been most judiciously and economically expended by them, and so honestly and faithfully has every dollar been applied to the purpose for which it was intended, that it is a mafter of astonishment to strangers and visitors generally, that so magnificent an edifice could have been erected at so comparatively moderate an outlay. Thus far there has been expended about \$2,000,000 and it is estimated that to complete and furnish the building and properly improve the grounds surrounding it—consisting of ten acres—will require the outlay of about \$1,000,000 more, thus making the total cost of the building and grounds about \$3,000,000.

PUBLIC PARKS.

It was unfortunate that the city was not provided with park grounds years ago, when grounds could have been purchased at comparatively moderate cost, but as year followed year available spots were seized upon one after another, and converted into residence lots, until the hope of a public park seemed doomed to disappointment.

One chance yet remained in the old picule grounds on the Des Moines river, at "Devil's Gap." The announcement that this romantic spot, and a large tract of ground beside, had been purchased and would be immediately thrown open to the public for a pleasure resort to be known as Prospect Park, was received with great satisfaction on the part of the public. The park includes, in all, some sixty acres of woodland lying north of the city, and more centrally located than any other spot that could have been selected. All the principal streets from Sixth to Thirteenth lead directly to the grounds.

Nature has already done much for the place. One would have to travel many miles from Des Moines to find another such wild, romantic region—so picturesque and varied in its segnery.

On the river bank is an extensive green sword sufficiently shaded with gigantic oaks and elms, to have made it long since a favorite resort of picnics and pleasure parties. If you would take a little invigorating exercise, you may climb the rugged steep of Prospect Heights. Having gained the summit, a magnificent panorama of the surrounding country, the river, the valley, the far-reaching prairie, with miles and miles of green meadows and cultivated fields, bursts upon your view. Here is Prospect Boulevard, eighty feet wide, and forming, with Fountain Avenue, the finest drive in the city, extending the whole length of the southern limit of the park. A short walk brings us to the narrow descent bearing the euphonious name of Devil's Stairway. This leads to the Sylvan lake, at the source of which you enter a glen so quiet and retired that you may

imagine yourself at once a thousand miles from Des Moines, enjoying the wild solitude of the outskirts of civilization.

Winding drives and carriage ways under over-arching branches; meandering walks among the trees and through the underbrush, over rustic bridges and creeping along the bluffs; irtificial lakes, grottos, swings, summer houses, and rustic seats, have already been provided, and the improvements made have rendered it accessible to the public, and adaptee to the comfort and convenience of visitors

#### CEMETERIES.

Woodland Cemetery, our beautiful "city of the dead," is situated in the northwestern portion of the city. The land is gently undulating, uplands and dells and shady groves abound, and a small stream quietly pursues its way through the grounds. It contains many elegint designs in statuary and monumental sculpture, and with the care bestowed upon it, and the improvements constantly being made, it is fast assuming the appearance of a landscape garden, as well as that of "God's Acre." Immediately north of Woodland Cemetery is the Catholic, and the Jewish Cemetery adjoins it on the northwest.

# HOSPITALS AND FREE DISPENSABIES.

The Cottage Hospital, a most beneficent and praiseworthy institution, was opened for the reception of patients in July, 1878, and is located in a pleasant and comfortable building in the northern part of the city. It is sustained in part by voluntary contributions, and few people have any adequate idea of the work that is being done by this institution and of the great good already accomplished. Up to the present time they have received and treated 595 patients, many of whom would have had no place of refuge in the time of sorest need had it not been or the charitable hand extended them by the hospital. It has been the means of alleviating un told sufferings.

No patients are received having contagious diseases, but any and all who are sick, and have nowhere else to go, are cordially welcomed and kindly cared for. Such as are able to pay for treatment do so, but others are received and given the best of medical skill and nursing.

There are also in the city two institutions known as Free Dispensaries, the object of which is to give free medical services to all who present themselves, and are unable to pay. The druggists generously co-operate with the physicians and furnish medicine gratuitously. Des Moines Free Dispensary meets daily from 1 to 2 P. M. except Sunday, room 16 Exchange Block, over 311 west Walnut. Monday, Dr. L. C. Swift; Tuesday, Dr.

able.

Charles D. Moore; Wednesday, Dr. T. Cookery Thursday, Dr. C. E. Currie; Friday, Dr. O. D. Benson; Saturday, Dr. A. J. Crawford.

IOWA STATE FAIR GROUNDS.

The Iowa State Agricultural Society is now permanently located in Des Moines with its office in the State House. The directors of the society availed themselves of the proposition made by the Twentieth General Assembly, to the effect that the State should appropriate fifty thousand dollars toward the purchase of new grounds, on condition that a suitable location for the purpose, which would donate an equal amount, should be selected. Des Moines was a ked to raise the amount, which her enterprising citizens have done, and the State fair will now have a permanent home. The grounds selected are one mile east of the city and admirably adapted to the purpose.

The selection is the best that could have been made. The grounds are watered by half a dozen large springs, there is an abundance of timber, a mile course can be easily constructed, and everything necessary for the requirements of the society. The lands are touched by nearly all the ruilroads from the north, south, west, and east. The drive from the dity will be one of the finest in the State. The board has acted wisely and for the best interests of the association. The last fair was the grandest exhibition of the products of the soil and dairy, agricultural implements and manufactured products, and fine stock, ever held within our State. The State Society has been controlled, as a rule, by the best minds in Iowa; its affairs have been conducted with intelligence and prudence, and its annual volume of transactions has accomplished a great work toward inviting immigration; it has given wide circulation to a knowledge of our resources to other States and countries; its conspilation and preservation of statistics, its collections of the products of the field, and its library, are value

TELEGRAPH.

The industries of Des Moines, which have shown such remarkable improvement during the past few years, and which draw their supplies from all portions of the United States, demand an extensive system of telegraphic communication, which is furnished by the Western Union Company, with two offices in the city under the management of Mr. T. A. Yearnshaw. Seventeen persons are employed in these offices in the capacity of operators, clerks, and messengers.

THE AMERICAN DISTRICT TELEGRAPH COMPANY.

The American District Telegraph and Fire Alarm Company is composed of the best Des Moines business men, and is rapidly growing in

popularity. Nearly all the fire alarms are being sent in over this system. The messenger department is something long needed in the city, and it is highly appreciated. This system puts every home in direct communication with the public department for the small sum of \$6.00 per year. One hundred and fifty private boxes have already been rented out, besides twenty-five public fire alarm boxes. Their lines are extended in every portion of the city. The officers are, C. H. Gatch, president; H. E. Teachout, vice-president; J. G. Rounds, treasurer; G. H. Williams, secretary; C. K. Mead, assistant secretary.

# TELEPHONE EXCHANGE.

In these days of apid transit and expeditious transaction of business, the telegraph has been supplemented with the telephone, so that business men are enabled to hold personal conversation, although widely separated. Des Moines was not siow to recognize the benefits to be derived from this invention, and her telephone system is excellent, and there are now 765 patrons of the exchange in the city. Besides these, Des Moines has telephonic communication with over one hundred cities and towns in the surrounding country, and the business transacted through this medium has become so large as to necessitate a separate department in the exchange. It is said by those familiar with the telephone business, that this city has the finest construction work, and we claim the Central Union Telephone Company have the best exchanges in the West. Sixteen regular lady operators are employed in the exchange, and nine men on outside work. There are over five hundred miles of wire within the city limits, and an average of eight thousand connections each day is made at the exchange. Much credit is due to the manager, Mr. C. K. Mead, for the excellent and business-like manner in which the exchange is conducted. The company is about to make some important changes by way of adding new style switch boards and more room for operating.

# FIRE DEPARTMENT

Des Moines has a fire department equalled in its efficiency by but few cities in the country, and surpassed by none of the same population. The paid department consists of fifteen men, besides the chief—a fireman of long experience—his assistant, and the six drivers. There are in the city nearly 27½ miles of water mains with 259 hydrants. There are tour engine houses—two on each side of the river—four hose carts with 4,950 feet of house, two hook and ladder trucks, and three chemical engines, which have proved very effective in extinguishing fires, and two patrol wagons. The department has fourteen horses, all selected with the greatest care and trained for the work. They are kept constantly har-

very satisfactory.

and five hundred if necessary.

nessed, and the drivers sleep in a room immediately above, in which is a gong which sounds by connection with the telephone. The harness is fastened everywhere with snaps, so that hitching up is the work of an instant. The efficiency of the fire department is greatly increased by the American District Fire Alarm Telegraph, and the average time occupied from the time the first alarm is sounded until the firemen are in their places and the horses on a wild run through the streets, is from twelve to fifteen seconds. Every second of time is made the most of, and it may be said that Des Moines was never so nearly fire proof as at present. The city has spared no pains in perfecting its fire department, and it is an honor and credit to Des Moines.

## ELECTRIC LIGHT.

The electric light is now well introduced into Des Moines, and proves

Of the three companies now in the business here, the

Des Moines Edison Light Company is the oldest and occupies a two story brick building 52x44, in which they use one two hundred and fifty horse power, and one two hundred horse power Heine Safety boiler, one two hundred horse power Buckeye automatic engine, and one one hundred and twenty-five horse power Armington & Symes automatic engine, two eight hundred light Edison dynamos, and two six hundred light Edison dynamos, with all the necessary apparatus, including autumatic regulators. During the year they increased their machines from two of twelve hundred to two of sixteen hundred lights. They use the Edison Incandescent Light, which is a thread of carbon heated to incandescence in a sealed glass globe, and run night and day furnishing light and power, at rates much less than steam power, the latter from one-tenth horse power to ten horse power, over about nine tons of copper wire for main. They now furnish three thousand two hundred lights, and can furnish four thousand

The Capital City Electric Light Company have two Armington & Symes engines of fifty horse power, and two forty light dynamos. Their is the Van Depoele system, and they furnish the city with sixty are lights. Regan Bros. Electric Light Company use the Thompson-Houston system.

They have one of the finest engines to be found in the West, a Westinghouse High Pressure of sixty-five horse power, which runs as noiselessly as a sewing machine. They have two large Thompson-Houston dynamos driven at the rate of one thousand revolutions a minute, producing sixty are lights, each of two thousand candle power. The firm has ordered another engine and two additional dynamos. The apparatus is under the skillful management of Joseph Deemer, who is very proficient in this line

They are so located that they can furnish light to both sides of the river, and they intend enlarging their building as soon as the weather will permit.

#### WATER WORKS.

Des Moines uses the Direct Pressure system of water works, and the subterranean aqueduct, supplemented by the Raccoon river, from which the water is taken, is soft and pure. The water company have made extensive improvements to the works, during the past year, involving an outlay of many thousands of dollars.

#### GAS WORKS:

Of the gas works it is only necessary to state, that they are first class, and amply supply the demand, with gas of excellent quality. The lights upon the streets are numerous, and are kept in good condition. There are five hundred and twenty-five gas lamps and four hundred and seventy-three in which oil is used.

## Cunibus Lines.

No better omnibus line can be found in any part of the country than that of Johnson & Son, of this city. They are always at the depots at the arrival and departure of trains, day or night, to take passengers to any part of the city. They have kept pace with the city's progress, in furnishing transportation accommodations, for all occasions, and have recently added a line of carriages to their other conveyances for the convenience of passengers.

#### SIGNAL SERVICE.

The United States signal service established a station in Des Moines, August 1, 1878. Five observations are taken daily and reported to Washington by telegraph, from which, together with the reports received from other stations, of which there are one hundred and thirty-five, indications and predictions of the weather are made for the next twenty-four hours. The Des Moines station is one of seventeen printing signal stations in the United States, and has been of special benefit to residents of this locality. This station is under the management of a thoroughly competent officer, Sergeant W. F. Conrad, who is fully informed on all matters pertaining to the weather. It was established here August 1, 1878, and supplies one hundred and one postolices with printed bulletins. The cold wave signal was established in 1883, and has proved of great benefit to dealers in perishable goods and to radroads.

#### STREET RAILWAYS.

Des Moines has two street railways of which that known as the Des

Moines Street Railway Company, Dr. M. P. Turner, president, is the oldest and most prominent. This company made extensive improvements last year in additional track and new cars, and are contemplating other improvements for this season. They have now twenty-one cars, fifty-five men, and one hundred and twenty horses, and run over twelve miles of They intend to extend their lines by laying from three to five miles additional in 1886. Dr. Turner has shown remarkable energy in the management of the affairs of the company, having had much to contend with during the past few years, as his track has been disturbed more or less on account of paving and sewering the streets on which it was laid. thus necessitating much trouble and expense to the company. Much has been said about the cost of our improvements and the amount the city pays for water and gas, but the street railway instead of being an expense to the city, is paying a revenue into the treasury. While the gas and water companies have been worth in building up the city all that they have cost, the street railway has been of equal benefit without any expense to. the city. It is the intention of the company in the near future to meet all demands calculated to benefit the city and the public. The Des Moines and Sevastopol Street Railway is an enterprise which was inaugurated during the past year, by which the suburban town of Sevastopol is connected with the city. It is two piles long, and cars run at frequent intervals, affording a great convenience to the residents of South Des Moines.

EXPRESS COMPANIES.

The United States, Americant Wells, Fargo & Co., and the Pacific Express companies, have offices here with connections in all directions.

TRANSFUR COMPANIES.

Some idea of the great amount of business transacted in transfer of goods between the business houses and manufactories, and the depots may be gained from the statement that six large and well disciplined companies are engaged in it, and the transfer business has become a large and important interest in Des Moines.

## MERCANTILE INTERESTS.

EMBRACING THE PROMINENT MANUFACTURERS AND LEADING WHOLESALE

In our general review of the business, manufacturing, etc., we have spoken of the various interests of Des Moines, and we now mention the

leading industries, manufacturing and wholesale, of our city. Every line of trade is represented by men whose characteristics are such as justify us in speaking of them in the highest terms of braise

The trade that centers here is supported by the country for hundreds of miles in extent, reaching out into the territories beyond. With the rapid growth which Des Moines has made in the last few years, and the trade not only of Iowa, but of the entire northwest, tributary for whole-saling goods and distributing manufactured products, our city is fast becoming one of the best commercial points in the country.

# MANUFACTORIES.

#### FLOURING MILLS.

The flouring mills of Des Moines are four in humber. The capacity of these flouring mills is about five hundred and fifty barrels per day, and the increased facilities for the transportation of grain from the great wheat growing districts of the Northwest, enables our millers to successfully compete with other portions of the country in the production of flour. Radical changes have been made during the past few years in the system of milling; and the result is the production of flour of the very best quality.

We have also a large mill for the production of oat meal, which is one of the most important industries of the city. This mill is situated between the Rock Island and the Wabash railroads, thus giving the best possible facilities for shipment, and the elevator connected with it has a capacity of 580,000 bushels of grain; while the out meal manufactured is of the best quality, for which orders are correspondingly large.

#### FOUNDRIES AND MACHINE SHOPS.

The iron works of Des Moines, which number six establishments, are among our most important industries. This branch of business has been constantly increasing, and a large trade is controlled, as our manufacturers and conveniences, and commodious, provided with all requisite machinery and conveniences, skilled labor is employed and liberal wages paid, hence they can guarantee work done here as perfect in finish, and in quality and durability equal to any made in the East.

#### WAGON AND GARRIAGE FACTORIES.

We have three houses engaged in this important branch of manufac-

State for the superior quality, and uniform reliability of their wehicles, from a handsome phaeton to a heavy transfer wagon. Many of the first carriages seen on our streets are the workmanship of Des Moines artisans and they also manufacture farm and spring wagons, and buggies of various styles.

SCALE WORKS.

Two firms in Des Moines are engaged in the manufacture of all value ties of scales, making a specialty of railroad and other large scales, which for accuracy and durability are not surpassed by any received here from eastern factories. They have in their large buildings every facility of doing first-class work, and the product of these factories is creditable to home industry.

The rich soil of Iowa and especially the central portion of the State if

well adapted to the growth of flax, which is one of the most profitable crops the farmer can raise. The linseed oil, oil cake and meal, is one of the important industries of Des Moines, and two houses are engaged at this manufacture, one of which is the largest in the State. The product of these mills is of the best quality, and well-known to the trade. A read market is found for all the oil which they can produce, and although a present much of the cake is slipped to foreign markets, yet it is rapidly becoming popular at home as feed for stock, and large quantities are sold to dairymen, stock raisers and farmers. The value of this article as most nutritious food for cattle is well known, and has been attested by successful use. These firms furnish seed to farmers in order to encourage, the growth of this crop.

Two houses here are engaged in this industry, employing about fortfive men, and have built up a business which is not only creditable and profitable to themselves, but of value to the city also. This has become one of the most important industries of Des Moines, increasing from comparatively small beginning a few years since to its present large pro-

MILL FURNISHERS.

They are fully conversant with the details of the business, and in the advantages offered to the trade compete successfully with any.

With the advancing tide of business in Des Moines, their buildings are becoming too small for their increasing trade, reaching out into many of the Western States and Territories

MARBLE WORKS.

There are three firms in this city engaged in the marble and granite

business, who import foreign marble and granite direct, and in American goods they buy from first hands, which enables them to duplicate eastern prices. They manufacture, in elegant and artistic designs, all varieties of marble and granite, for cemetery or ornamental purposes, employing a large force of skilled workmen, and produce some of the most beautiful specimens of artistic work in this line to be found in the West. Many, of the costly, monuments and headstones in Wood and Cemetery, specially noticeable for the elegance and taste displayed in design and execution, are the product of Des Moines marble works.

WHITE BRONZE WORKS.

The White Bronze industry of Des Moines is one of four factories in the United States, each of which is independent as to the amount of territory they supply. The Western Bronze Co. of this city control Iowa, Missouri, Kansas, Colorado Nebraska, Wyoming and Dakota. Over one thousand monuments have been sold in Iowa, some of them costing thousands of dollars. The Des Moines Company represents a capital of \$100,-100, and the stockholders are among the best of our business men whose aggregate financial rating represents upwards of half a million dollars. Over fifty thousand profuments of white, bronze have been erected, and scientific men endorse the lasting properties of this material, and profument of the coming and crowning material for monuments. The company not only manufactures monuments, but statuary of all sizes and styles, and are prepared to erect life-size statues, modeled from photographs or portraits, and they can justly claim to be one of the bost manufacturing institutions in this rapidly growing city.

There are six firms in the city who are engaged in the extensive manufacture of brick, giving employment to a large number of workmen, the clays of this vicinity being of superior quality for the manufacture of brick and tile. The brick manufactured here is of excellent quality, as evinced by their general use in the city, especially for the better class of both residence and husiness houses. Not only common brick of the best quality is manufactured here, but also pressed brick.

BRICK AND THE WORKS.

We have the largest drain tile works in the state, two firms being engaged in this branch of manufacture. The product of these establishments is in great demand in various portions of the country for use in reclaiming low and moist lands. These large industries are prominent among the manufacturing interests of the city, and add largely to her volume of business.

ARTIFICIAL STONE AND SEWERAGE PIPE.

This branch of manufacture has attained immense proportions, and

includes drain sewer, well pipe, chimney flues, lawn vases and urns of various styles. The stone is manifectured of fine sand, cement and other ingredients, and may be made to imitate almost any variety of natural stone in appearance, while for durability and hardness, it is equal to any quality of quarried stone. It hardens with age, takes a smooth surface and polish, and is easily moulded into any desired shape.

#### BOILER WORKS.

The immense mining and manufacturing operations in Iowa, createa great demand for steam boilers, and Des Moines manufacturers receive their full proportion of trade in supplying this demand, besides a large business outside the state. They have a merited reputation for excellence of workmanship.

#### PLOW FACTORIES.

The rich agricultural region about Des Moines and the large territory opened to the trade of the city by the advent of new rail roads, creates an almost unlimited demand for agricultural implements of all kinds, fore most among which in importance is the plow, and although we have two factories for the manufacture of plows, cultivators, harrows, etc., yet they are unable to keep pace with the demands of the trade. Their plows are of the best quality of material and workmanship, and well adapted to our soil.

#### BARBED WIRE FACTORIES.

This industry is one of the most prominent in Des Moines, even as it has become one of the most important in the United States, and the country rendered tributary to Des Moines by her numerous railroads, opens a field almost limitless in the trade it barbed wire, which is gradually superseding all other styles of farm fence. There are three companies manufacturing this staple, and the trade extends throughout most of the western States and territories. This is a business which must necessarily increase in importance under the rapid development of the country tributary.

#### STARCH FACTORY.

The Gilbert Starch Works is the most extensive factory operated in Des Moines. Their five story buildings were creeted at a cost of \$100,000, while their machinery necessitated a correspondingly large outlay and their works have a capacity of 3,500 bushels of corn per day. They have an elevator connected with the factory having a capacity of 150,000 bushels. The corn crop of Iowa is easiest of access here, the water supply good, coal in any quantity, railway facilities are the best, both for bringing material to the works and shipping the manufactured product. This

is the largest establishment of the kind west of New York, and employs a large number of hands constantly. The reputation of the Gilbert Starch, for purity and general excellence, is established far and wide, and it is one of the brands which is most in demand for the trade.

алсонов works.

Des Moines has one establishment for the manufacture of alcohol, which is said to be the largest in the country. These works have a capacity of about five thousand bushels of corn per day, and their immense product is largely shipped to foreign parts. There are in connection with these works, cattle sheds sufficient for the accommodation of five thousand head of cattle, and large numbers are annually fed here for market. The inagnitude of this establishment largely augments the grain trade of the city, and also gives employment to a large number of workmen in the manufacture of barrels and casks for the transportation of the alcohol.

It has remained for a Des Moines man, Mr. T. C. Dexter, to invent

one of the best labor-saving machines known in the work of publishing a newspaper. We refer to the Dexter Folder Cutter and Paster, which is a marvel of mechanical ingenuity, and does its work as though endowed with human thought, and with the greatest precision and accuracy. It is attached in the rear of the press receives the shedts as they pass from the press, folds and delivers them in a packing box without the aid of a feeder. Its speed is limited to the capacity of the press to which it is attached, and when so desired will cut, paste and fold a quarro paper, allowing its leaves to be opened like those of a book, and though it handles the papers

before the ink has had time to set, it does not soil them. All the change required to fold different sized sheets, is simply to move the gauges. It will fold sixteen page periodicals of various sizes; delivering them page size, folded three times. It will fold, paste and trim eight-page work, and deliver at either the third or fourth fold.

The factory, has now been in operation over five years, and these folders have been sold in nearly every State in the Union, giving perfect satisfaction. They have been placed in all the principal cities of the East, where a critical market might be expected, but the result has been very satisfactory, with a constantly increasing demand, and although the company has floubled the capacity of the works, their orders are received more trapidly than they are able to fill them. Entire originality is claimed for which machine, the inventor never having seen a paper folded by machinery funtil he witnessed the operation upon his own invention, and its simplicative is only equalled by its perfect accuracy.

#### CRACKER MANUFACTURERS.

Des Moines has two firms engaged in the manufacture of crackers for the trade, and the goods sent out by them are unexcelled by any in the market, and with an established reputation for excellence, the demand for them is constantly increasing.

The manufacture of brooms has become an important industry in Des Moines, and gives employment to a large force of working. Two houses are engaged in making brooms of every description, and they produce an article which meets with universal favor. A stock of materials and manufactured articles are kept on hand at all times, and they have an extensive trade.

## PAINT WORKS.

Des Moines has one factory for the production of paints, which is thoroughly equipped and furnished with all the machinery and appliances for the manufacture of prepared paints of all colors and shades. In its general appointments it will compare favorably with any in the west, while for quality and reliability of products it has gained an onviable reputation.

## GALVANIZED IRON CORNICE.

From the inception of this innovation in the construction of our buildings, it has met with universal commendation, from the fact of its general utility, and the ease with which it is wronght into the many pleasing and artistic shapes in use in the architecture of the present time. It is impossible to estimate the amount of labor and capital saved in the substitution of galvanized iron, in dormer windows, door and window caps, cornice and other front ornaments. It is in use on most of the large buildings in our city, and three houses are engaged in its manufacture.

# PLANING MILLS.

The manufacture of sash, doors and blinds, inside finish, mouldings,

balustrades, newel posts, etc., is an important factor in the business of the city, and engrosses the attention of seven firms, whose trade is widely extended throughout a large territory of the Northwest. One of these houses is also extensively engaged in the manufacture of school and office furniture, and the character of their work has established for them a fine reputation throughout the West. Within the last few years, machinery adapted for woodwork has been so improved and perfected, that there seems scarcely any limit to the range of operations performed by this class

of time and labor saving inventions.

#### POTTERIES.

The superior quality of clay found in the vicinity of Des Moines for the manufacture of stoneware and tiling, and its great advantages as a distributing point, has induced the establishment of several works for the production of these goods. The combined annual product of these works in hundreds of thousands of gallons of ware. The most approved appliances have been added to the effect of the business, which now produces a superior quality of earthenware, as well as flower pots, hanging baskets, arms and vases in many beautiful designs.

#### SPICE MILLS.

We have one firm, which is located in a splicious business block, fully equipped with the latest improved machinery and appliances for roasting and grinding coffees, and manufacturing pure spices and balting power.

Amply supplied with coffee roasters, coffee mills, spice mills, etc.,

Amply supplied with coffee roasters, coffee mills, spide mills, etc., the facilities are as nearly perfect and complete as any mills in the West, and their business is conducted with systematic regularity and precision.

The process used at these mills insure absolute purity, while they

The process used at these mills insure absolute purity, while they reain the original strength and the most pungent and valuable qualities, and from personal knowledge of their spices, collees and baking powders, we feel warranted in the statement that for these qualities they are very popular wherever they are known. Their baking powder has been pronounced by actual test to be of the highest standard of quality in the market. Their business has increased year by year since it was established in this city. Their goods are sent throughout the Northwest, and never fail to give entire satisfaction. Conducing in so great a degree to the substantial benefit of the community and contributing so largely to the reputation of the city, this house is entitled to high consideration and wdespread trade.

## FURNITURE.

The growth of this western country, caused by the building of rail-roads, by immigration, by the establishment of manufacturing and other important enterprises, creates a steady demand for all classes of furniture, which can be purchased in Des Moines as cheap as from eastern houses. In no branch of manufacture has there been a greater revolution than in this, until now upon entering an establishment devoted to this particular life of trade, it seems almost impossible for inventive genius to further perfect the many clegant and comfortable articles of furniture.

There are three wholesale familiare houses in Des Moines, darrying complete and extensive stocks of modern design and artistic finish, and doing a large and increasing business.

#### VINEGAR AND PICKLE WORKS.

This industry is represented in Des Moines by one house, which does a large business in this line, supplying the wholesale trade here with these commodities, as well as various kinds of table sauces. Large quantities of apples, also cucumbers and other garden products, find a ready market here for the production of vinegar, pickles, etc. They have a large and increasing trade.

#### SHIRT MANUFACTURING.

The manufacture of fine dress shirts is a branch of business which when properly conducted is a great convenience to the public. There are three houses in Des Moines who are engaged in the manufacture of shirts, collars, cuffs and fine underwear, doing all kinds of work in their line and employing a number of traveling salesmen. They manufacture largely for the trade and guarantee all work of excellent quality and superior workmanship.

## KNITTING FACTORIES.

There is no question as to the value of knitted goods as a commodity, and the goods produced by the Des Moines Knitting Factory command a ready sale. They have all the necessary appliances for manufacturing jackets, mittens, leggings, scarfs, hosiery, underwear and all descriptions of knitted goods.

#### CIGAR' FACTORIES.

The tobacco business in this country, from its magnitude, must be considered an important interest, and the manufacture of cigars forms one of the prominent industries of Des Moines. Eight houses are devoted to this branch of industry, and their annual production is an item of considerable magnitude. The cigars placed on the market by these houses are equal to any known to the trade, comprising all the standard and reliable brands, while their business aggregates hundreds of thousands of dollars yearly.

#### COOPERAGE.

The extensive pork packing establishments and the immense distilleries, together with numerous other factories of various kinds in the city, create a very great demand for goods of this class, and a large barrely factory is in operation in this city which employs one hundred men, besides several smaller factories, making a general line of every description of cooperage, and their business is an important addition to the many manufacturing interests of this city.

#### SOAP FACTORIES.

No article of manufacture commands a more ready sale than soar,

and in this branch of industry two houses in Des Moines are engaged, having all the necessary buildings and facilities for an extensive business, and they place upon the market a superior article of soap. The product of these two soap factories has rapidly grown in public favor, as the large orders they are constantly receiving, for all grades of staple and fancy soaps, fully demonstrates.

#### TRUNKS.

Des Moines has one house devoted to the manufacture of trunks, and as they make all grades of trunks, valises, traveling bags, and other articles purchased here may be relied upon as excellent and durable in quality and workmanship.

#### WOOLEN MILLS.

Des Moines is rapidly gaining a reputation as a commercial metropolis, and during the last few years has made immense strides in securing and retaining the trade of this section. Not the least important branch of industry, and one deserving recognition, is the Capital City Woolen Factory, which is one of the largest in the West. They manufacture a fine quality of woolen goods, in cloths, cassimeres, blankets, yarns, etc., with which their large rooms are filled and their products are highly deemed by the trade.

#### FILE WORKS.

Few persons are aware of the extreme care requisite in the manufacture of files, as they require the most perfect tempering and a uniformity which is a sure test of the skill of the manufacturer.

We have but one house engaged in the manufacture of files, but they an extensive business in filling orders for jobbers, and as they use the best Ames steel, and employ only skilled workmen, the result is that the tes manufactured by them have a reputation second to none known to the trade. Their works are operated by steam power, and the increase in their facilities for manufacturing.

#### CONFECTIONERY.

The manufacture of candy has assumed surprising proportions during the last few years, and three large manufacturing and wholesale houses are engaged exclusively in this branch of business, and their product is in every respect equal to that brought from eastern factories.

#### SUSPENDER FACTORY

Among the new industries established in our city, we are glad to note the Northwestern Suspender Bactory. The company has procured the best of machinery and all modern appliances for the manufacture of these

goods. Their factory is operated by steam and the entire outfit is of the very best known to the trade. Their capacity is one hundred and twenty five dozen per day, and they furnish goods of the very best quality at a price as low as they can be obtained in the east, to the home trade of the jobbers and dealers in this class of goods, in the city. Their house is represented by traveling salesmen through whom they reach a large trade in the Western States and Territories. This company has a patent attachment for suspenders and braces of which they have the entire control, and which is valuable, as the experience of those who have worn them will attest.

ARTIFICIAL LIMBS

It is only within a comparatively recent period that the manufacture of artificial limbs has become a prominent industry in this country. As a natural consequence of the late war, there are many maimed and crippled veterans scattered throughout all sections of the country, and the frequent accidents on railroads, in factories or on farms, through carelessness or from unavoidable causes, has largely increased the number of those whose legs and arms have suffered amputation, hence, the inventor of perfectly constructed limbs is deserving of recognition as a benefactor of the human race. One house in Des Moines is engaged in the manufacture of artificial limbs, which have proven highly satisfactory, as they combine lightness, durability, ease of action and simplicity. This firm has achieved a graifving success in this line of manufacture.

LITHOGRAPHING, STEREOTYPING AND WOOD ENGRAVING.

Lithographing is done by three firms in Des Moines, and their work is executed in the most skillful and artistic manner, and will compare favorably with that of any establishment in the country. The elegant specimens of work done by them, has gained them a wide reputation, and orders are constantly being received from all parts of the country. Two houses in the city are engaged in stereotyping, and wood engraving is also done here. Two firms are doing an extensive business in engraving and publishing maps, keeping agents constantly at work selling their goods and doing an extensive business throughout the Northwest.

## WHOLESALE BUSINESS

GRAIN TRADE.

Des Moines is not a speculative market. Option buying and selling finds but little favor among our merchants. The actual property finds a ready market at fair prices. Much of the grain brought in by farmers

wheat, the out meal mill the oats, and starch and alcohol works much of the corn. Even the grain bought by dealers for shipment is taken at good trieds.

There is also a project that with the opening of another season one more levator will be built here for the purpose of handling grain from cars, and that our city will become in the near future a good point from which grain will go direct to the seaboard.

The year's business has been generally satisfactory, and the grain rade is in strong hands with capital largely out of proportion to our element capacity. The character of the trade has changed but little the past war. Whatever improvement has taken place lies in the growing disponant to buy everything offered, to accumulate, and have grain always on hand to sell.

## PORK PACKING.

The city possesses great advantages for the pursuit of this industry, being located in the center of the second State in the Union in the production of hogs, and in the numerous railways converging to this point from all portions of the State giving ample transportation facilities, and Des Moines has become one of the most important pork packing points west of the Mississippi river, and acts as a gateway for supplies and shipments to a large territory of country. The brands, cuts and cure of our backing houses maintain their popularity, and command the highest market prices. This is one of the most important interests of Des Moines, and four companies here transact a very heavy business in the packing of ork.

# PLOUR AND PRODUCE

The extent of the ficur and produce commission business transacted in this city is not generally appreciated by the public, but there are a number of houses engaged in this business whose annual transactions ggregate an immense sum. For several years the commission business has shown a large annual increase, which is due to a great degree to the arrivalled facilities for shipment enjoyed by our city. The farm, garden, brehard and dairy products of one of the richest agricultural regions in the world, are pouring into our city, and with the ample facilities for storage and shipment possessed by these firms, the quantity of these products andled by them is simply immense.

#### LUMBER TRADE.

Among the various branches of business which have materially contributed to the reputation of Des Moines as a commercial center, and

added to the general progress of the city, are our lumber dealers, of whom there are seven firms, and the enterprise displayed by those engaged in the lumber business in Des. Moines has been and is of such an active and aggressive character as to center at this point a very heavy trade. Several operators in this direction are now transacting a business, which involves a large amount of capital, and results in a business of great magnitude, whose business connections extend not only throughout Iowa, but the western and southern states, and they are constantly increasing the scope of their operations, and opening new fields in various parts of the country.

WHOLESALE GROCERS.

Among the many industries which have tended to extend and enlarge the commercial importance of Des Moines, perhaps none has had a more favorable influence upon the mercantile relations of the city than the whole sale grocery trade, and this branch of business is one of the points upon which we have based our claims to rank as the commercial center of Iowa Possessing superior advantages in her geographical position and transport ation facilities, as well as the commercial standing and enterprise of her leading merchants in this line. Des Moines can to-day furnish staple and fancy groceries at prices which will successfully compete with any city in the West. We have six firms engaged in this business, composed of men who are alert, active and ready for any enterprise tending to enhance the interests of Des Moines, believing that whatever tends to elevate the city, exerts a beneficial influence upon their own business, and fully deserving of the success which has attended them in the past, and of further success in the future.

#### AGRICULTURAL IMPLEMENTS.

In no branch of manufacturing has there been a greater advance made in articles of practical utility than in agricultural implements. The production of this class of machinery has made wonderful revolutions in farming, every farm being supplied to a greater or less extent with these essentials. In Des Moines, the center of one of the richest agricultural regions in the world, the trade in farm machinery has assumed large proportions and six houses wholesale this class of goods. We have reason to believe from the inquiries received, in regard to the matter, that many of the farming implements used in this section of country will be manufactured in this city, in the near future.

DRY GOODS

The trade in this line is one of the largest and most important in the city. Two houses represent the wholesale interests, whose stocks are heavy, store rooms capacious, well ordered and lighted, and the complete

and choice assortment which is at all times displayed to the trade, offers great inducements to purchasers. Their business is very satisfactory, and is being extended through the vigor of western enterprise.

## CARPETS, CURTAINS AND OIL COUTHS

Five firms in the dity deal in these goods, including all grades from the ingrain to the finest Brussels, Moquette and Wilton carpets, curtain damasks, and laces, window shades, plain and fancy, and upholsterer's articles, and the trade in this line is large.

## NOTIONS AND FANCY GOODS

While it would be almost impossible to enumerate the various articles which come under this designation, it includes an almost unlimited variety, which are essential in some way to every productive, enterprise and every household. These must have their supply from our important jobbing and minufacturing centers, and we find four extensive establishments in Des Moines engaged in supplying the demand for fancy goods and notions.

# BOOKS AND STATIONERY.

In all the wide range of industrial pursuits there is not a more intersting occupation than that of the bookseller, upon which the education of the masses and the enlightenment of the public in large measure depends, and there is no better evidence of refined taste in the disuschold than the resence of good books. It is a matter of congratulation to the friends of the cause of popular education, that much of the literature of to-day is imperior to that of the past, and that a taste for good reading is being cultivated among the masses. Four houses in Des Moines do an extensive wholesale business in this line, each employing a number of traveling salesmen, and their orders are received from all parts of the Northwest.

## SEEDS.

The two firms here are known throughout Iowa as among the oldest houses in this line of business in the state, and have become well known as the leading seedsmen in this section of country. Both these houses have obtained a reputation for fresh and pure farm, garden and flower seeds.

#### JEWELRY.

This important branch of industry is represented in our city by one house, which is the largest west of Chicago and north of St. Louis, and has an important bearing upon the commercial prosperity and mercantile thrift of Des Moines. This is the leading jewelry establishment of the west, and will compare tayorably with those of any city in the Union. The goods

are imported directly from Europe, the house employs a number of traveling salesmen; and does a correspondingly large business.

#### MILLINERY.

This branch of wholesale trade has three large representives in our city, who business extends not only throughout lowa, but all the adjacent States. These firms are composed of energetic, practical business men, and their business, in common with other wholesale interests of the city, is constantly enlarging. They carry in stock a complete line of all goods dealt in by the millinery trade, which they can furnish to dealers in the West at eastern prices; hence there is no necessity for going further east to replenish a stock in this, line.

#### HARDWARE AND CUTLERY.

As a branch of industry peculiarly successful in Des Moines, and forming an important factor in the commercial importance of the city, the hard ware trade is entitled to consideration in a review of the mercantile and industrial interests of the city. The advantages which Des Moines offer as a jobbing point are rapidly becoming known, as well as the fact that retail dealers prefer to purchase goods nearer home when they can do so at eastern prices, thus saving freight and time, and the result is a large increase in our wholesale business. We have three wholesale hardward houses in Des Moines, which are doing an extensive business. The story rooms are large and admirably suited to the purpose, and the stocks can ried by these houses are comprehensive, including all varieties of inventions and articles made in that especial line of manufacture.

# CHINA, GLASS AND QUEENSWARE.

One house of commercial importance in our city is the largest in the state in this line of business, buying direct from the factories and whole saling to the trade, and their system of buying enables them to enter into competition with eastern houses, duplicating their goods in quality and in price. This house is excelled by none in the northwest for completeness of assortment and in the amount of business transacted, employing a large force of traveling salesmen, and commanding the trade of a large territory in the northwest.

#### , pruggists.

Prominent among the wholesale interests of the city is the drug husiness, which is represented by five large houses. The importance of this business is scarcely recognized by those not directly connected with it, and these houses are represented by a large number of traveling salesmen, and their trade amounts to hundreds of thousands of dollars annually.

# PROPRIETARY MEDICINES.

There is but one firm who are exclusive manufacturers and pharmacists. They are conducting a large business, their preparations are among the most popular, and find a ready sale in almost every city, town and village in the great northwest. Since their removal to this city their sales have more than doubled. This might be taken as an example of what can be accomplished by men of high qualifications, energy and enterprise.

The wholesale druggists, also a number of retail houses, are manufacturers of standard preparations of their own, in the line of medicines, per tunes, etc., which are highly appreciated by the trade.

CIGARS AND TOBACCO.

The consumption of tobaccoin this country is so great as to give prominence to this branch of wholesale trade, which is represented in this city by six houses, whose sales aggregate a large amount annually.

There are four wholesale houses dealing exclusively in oils, and they handle all varieties of illuminating and lubricating oils. They employ a large number of traveling salesmen, and their business extends through the western states and territories. Our wholesale dauggists and grocers the deal in oil of various kinds.

BOOTS AND SHOES.

We have two firms in the city wholesale dealers in boots and slioes, who have achieved a reputation and acquired a trade which places them in the front rank of enterprise and success. Besides these, two other houses do both wholesale and retail business in this line. As a source of supply for the articles of boots and shoes suited to the markets. Des Moines occupies a conspicuous position and attracts dealers from all parts of Iowa and the Northwest.

#### BUTTER AND EGGS.

Iowa now occupies the front rank as regards the article of butter, and the business of packing and shipment of this commodity has assumed large proportions throughout the country. We have here four houses, shippers of butter and eggs, and the business transacted by these four firms extends over a wide territory in the northwest, aggregating hundreds of thousands of dollars annually. In addition to these houses, several of our commission dealers make a specialty of butter and eggs.

LEATHER AND SADDLERY HARDWARE.

The trade of Des Moines in leather and saddlery hardware is a branch

of industry which is constantly growing in importance, and is represented in our city by three firms who are among our most enterprising business men.

PAPER.

The amount of newspaper used by our various newspapers and publishing houses is simply immense; then the trade of a large territory tributary to our city, has made the business in this line important. There are five houses in this branch of trade. All kinds of wrapping paper is handled by these houses also.

WALL PAPER.

Three houses, of which one is among the largest in the United States, are engaged in this branch of wholesale trade, carrying a full stock of all varieties in this line of goods, and doing a very heavy business in this and other states.

MUSICAL INSTRUMENTS.

While we have no exclusively wholesale house in the sale of this class of goods, there are three firms which sell both at wholesale and retail, and the large amount of goods sold by these flouses shows the extensive business, as it also attests the excellence of the pianos and organs they handle.

# INDUCEMENTS TO CAPITALISTS AND HOME SEEKERS.

The intelligent reader of the foregoing pages will see that Des Moines has been richly endowed by Nature with all those resources that are the basis of prosperity and wealth, and that by the the enterprise of our people, the foundations of Iowa's Metropolis have been laid and the superstructure well begun. The rapid yet substantial growth of the surrounding country has been shown, and a thriving and enterprising city has sprung into existence, the metropolis of our beautiful Iowal. Thousands are locating here annually for permanent homes, because of our healthful climate heauty of location, our social, moral and educational advantages, and to all who are seeking new homes for health, wealth or pleasure, we say confidently that no portion of this or any other country offers greater induce-

The site on which Des Moines is situated is one of the most benutiful for all the purposes of a large and growing city that could have been chosen. From her central and commanding position, her intellectual and commercial conditions, Des Moines is destined to be one of the best and most attractive residence cities in the West. Many costly and elegant residences have been built, but let our advantages become known, and

ments, and to all such we extend a hearty welcome.

thousands more, annually from all parts of the world will make their lightes here, adding to our social attractions and helping thus to develope dup wonderful resources. Residence property is reasonable, though in gold demand, and the number of houses erected annually is surprisingly large. The opportunity for persons of moderate means to own their homes is the best, and we have a number of loan and building associations which have done much in assisting hundreds each year in securing homes.

Business projecty, although steadily advancing has always done so on its real merits, and abt owing to any fictitious value, and the opportunities for investment are still good. Many fine business blocks have been erected during the past few years, and many more are contemplated in the adar future, which will repay the builders well as an investment, while parties erecting suitable residences would do equally well, as the property would be in demand at a good profit.

Additional manufacturing enterprises, employing thousands of operatives, who must be fed and clothed by our merchants, would be of great be efit not only to the business men, but to every citizen. Nature has dole her part in supplying the great desideratum, fuel and water. Our railroad facilities are already ample, and are being increased every year; our advantages in every particular are sufficient. Millions of dollars are lost annually by the people of low, by not having within her own borders the processary establishments for manufacturing the thousands of articles in deliveuse, and the preparation of the products of her own rich soil. There is nothing which is calculated to build up a city faster, nothing that gives more prominence and commercial value, or enhances the condition of her business men more rapidly, than the operating of large manufacturing establishments.

The action of our City Council in offering to remit the city tax on factories for a certain length of time is appreciated, and we believe our County Board of Supervisors will also offer inducements to those who may engage in the manufacturing business here by the remittance of the county tax is a number of years, as it may aid in bringing hundreds of families, and possibly millions of capital, that may not be secured otherwise. The advantages possessed by our city, when presented properly to the inquirer are sure to be favorably received, hence the importance of sending information if every direction to those who may be contemplating a change of outsion. There are many industries that would prove remunerative which should be established here, and we believe there is no better locality in the west for manufactures of nearly every variety, than our city affords. Many are looking for new locations. Where shall they halt? They are looking

for a city which has railroad communications with different portions of the country, cheap fuel or good water power, surrounded by a rich agricultural region, and in a healthy locality. This is the place, for the resources nature has placed here without doubt will enable Des Moines to become the greatest manufacturing and commercial center, as it is now the best distributing point west of Chicago.

What Chicago and St. Louis are to-day in many branches of manifacturing, Des Moines, backed by her transportation, commercial and financial facilities, and the natural resources of the country tributary, may ere long, hope to rival. With all the advantages in favor of Des Moines it is undoubtedly the best point in the West to locate first-class industries and those manufacturers who will investigate the matter now and establish themselves here soon, will be the ones to profit most by the opportunities here offered.

Manufacturing is admitted to be the basis of success in the growth of a city, and this is fully realized by the citizens of Des Moines, who are desirous of giving all the encouragement in their power for the establish ment of new enterprises here. Every citizen takes pleasure in noting the growth of our various manufactories, the astonishing strides which the wholesale and jobbing interests have taken to supply the increasing demand for their goods, and the many new gateways opened for the entrance of other industries, which are bound to follow. Nowhere in the West is there a better point for the receipt of the raw material, the production and distribution of manufactured goods, nowhere can a multitude of workinen more economically support themselves and families, or more easily procure a home. We have shown the great advantages, natural and acquired, which Des Moines possesses for a manufacturing center, and we desire to call the attention of capitalists and manufacturers to theneeds of the city. Although Des Molnes has a large number of factories in successful operation, engaged in the manufacture of a variety of products, yet there is room for many more industries in various branches of manufac Des Moines wants more factories and wholesale business houses, and is anxious to have the excellent opportunities utilized, when the beneficial results are so apparent. The manufacturer who locates in this city is not dependent upon the present trade, favorable as it may be, but is establishing an industry which must expand year by year as the country tributary grows in wealth and population.

As a matter of information to those who are contemplating a change of location, and who may desire to know just what industries would prove remunerative here, and which are dspecially needed, we desire to indicate a few of the factories and wholesale houses for which we believe there is good business opportunity in Des Moines.

In the wholesale interests of our city, nearly every line of trade is appresented by houses which justify us in speaking of them in the highest terms of praise, but healthful rivalry promotes growth, and there is room at least another drouse in many branches of business. There is no better location in the West than Des Moines for all kinds of manufacturing and my one who is looking for a new site will do well to visit our city before locating.

ROLLING MILLS AND NAIL WORKS

Nothing would be more cordially welcomed by our railroad companies, jobbers, contractors and wholesale dealers than rolling mills and nail works. It is only a question of time when iron and steel works of magnitude will be established here. With so vast a field for all kinds of iron and steel goods and machinery as the Northwest will soon present, works of this character will be imperative, and there is no doubt they would be profitable from the very start. We are in possession of information which leads us to be leve that the coming season may witness the establishment of works for the manufacture of merchant iron nails and tacks. The large amounts of scrap iron available here, must, under the existing conditions, be shipped to the mills and returned to this point, thus paying freight both ways

ACRICULTURAL IMPLEMENTS.

Des Moines is one of the best locations in the west for the manufacture of all kinds of agricultural machinery. A first-class wagon and carriage fairory would be a profitable investment, as our agricultural implement deders sell annually thousands of wagons, which should be manufactured here. The manufacture of various farm implements in operation here, can not supply one-lifth of the demand, and there is encouragement for one or more first-class factories. The best market is the home market, and lowa being especially an agricultural state, it follows that the demand for this class of goods is very great; and the natural advantages for the prosecution of this branch of manufacturing, affords, strong inducements to capitalists and manufacturers to locate in our midst.

FURNITURE.

Furniture of all kinds should be more extensively manufactured, there being black walnut, cherly, oak, and other tvarieties of wood necessary for such purposes, found in this vicinity. The rapid development of the country tributary is constantly increasing the demand in this direction and presents a promise of abundant reward to those who will improve this opportunity.

#### GLASS WORKS.

The best quality of silicious sand for the manufacture of flint glass is found in the vicinity of Des Moines. No better location for glass factories can be found in the west with the necessary material at hand, the excellent home market and the facilities for shipments in every direction. The silicious sand in this vicinity has been tested, and proven capable of making glass of superior whiteness and brilliancy.

#### BOOTS AND SHOES.

There is no adequate reason why the manufacture of boots and shoes should not be extensively engaged in at this point. In this, as in many other lines of manufacture, we ship the raw material to the factory, and the manufactured product is returned to us, thus paying freight both ways, whereas the fact is that we are much nearer the great feeding grounds of the West from whence to obtain the material than are the eastern factories, and there is every certainty that boot and shoe factories located here would step at once in a lucrative business.

#### TANNERIES.

Large quantities of hides and pelts are shipped east from this point, and this city should have become ere this an important tanning center. In the rapid development of the Northwest, its hide business must vastly increase, as well as the demand for the manufactured product, and the necessary bark is readily obtained.

#### STOCK YARDS.

One thing which we need, and we believe the demand must soon be supplied, is good convenient stock yards. Not only ought this to be the great central feeding point in transit, but efforts should be at once put forth to make Des Moines a notable stock market. The yards should be large and conveniently arranged, and the butcher and the packer should be able to find here at all times what their business requires.

#### CANSED GOODS.

The field is open and particularly inviting for a factory for canning all varieties of small fruits and vegetables, especially sweet corn and tomatoes. The soil and climate are well adapted to the growth and perfection of these products, and the market is general among all classes of people. The wholesale grocery interest in this city could dispose of the entire product of a large factory, as they reach a large extent of country tributary to Des Moines.

#### KNITHING WORKS.

For manufacturers with limited capital there is a fine opening in the line of knitting works. Heavy knitted goods are a great and growing

requirement, and there is no danger of overstocking the market, or of injurious competition. The product of such a factory could be disposed of by our wholesale and retail dry goods houses, and the field is practically unlimited.

STOVE WORKS.

Extensive stove works appear to flourish in many of the large eastern cities where it would seem that competition is so great as to necessarily limit their patronage, and if located in Des Moines where the conditions are particularly favorable, they would be taxed to their utmost capacity. Heating apparatus may be ranked among the first of family requirements, yet eastern manufacturers have this field practically to themselves. In the matter of securing scrap and broken iron, stove works operated here would find great advantage over eastern towns, for up to the present time old iron is a drug and a misance throughout the Northwest.

PAPER MILLS.

All through the Northwest, building paper enters largely into the construction of houses. Tons upon tons are used in every city, town and villate, and the materials for its manufacture produced in abundance throughout our state, are wasted in vast quantities. A mill for its production, as well as that of wrapping and newspaper, if properly managed, could not fail to prove remuterative. Our wholesale and retail merchants, engaged in all branches of business use tons of wrapping paper, while the trade in newspaper, through our wholesale paper houses, and books and static hery is probably larger than in any city-west of Chicago.

SYRUP AND SUGAR.

Sorghum is a crop which never fails in Iowa, and the production of symphus been successfully darried on in some portions of the state, and a factory of this kind located here would undoubtedly prove profitable. Wherever a good syrup dan be made, sugar also dan be produced, and the experiments made have demonstrated the fact that sugar of excellent quality can be produced from Sorghum cane. Sugar has been made in phying quantities from amber cane and from beets, both of which can be produced in abundance in this vicinity, where the soil and climate are so admirably adapted to their growth.

## OTHER INDUSTRIES.

Which would prove profitable here are a factory for the manufacture of articles produced from flax straw which would be a good investment here, where so much straw is wasted. The flaxseed only being utilized by our linseed oil mills, which consume hundred of bushels per day. 'A factory

for the production of hats, caps, furs and gloves could be operated here where there is great demand for all such goods. The manufacture of baskets, tubs, buckets, and the various articles of wooden and willow ware, would no doubt, be a successful venture. Establishments for the manufacture of shelf hardware, entlery, dauggists, materials, sewing machines, also cotton goods and clothing would do well here.

We might mention many branches of business and manufacture which would be successful if located in Des Moines, but enough has already been said to induce any one who is looking for a new site for business, to visit

our city before locating elsewhere.

Any inquiries with reference to the business or manufacturing interests, will receive prompt attention by addressing the secretary of the Board of Trade.

## SUBURBAN TOWNS.

#### SEVASTOPOL.

This is a village of about five hundred inhabitants, adjoining the city on the southeast, being the oldest of our suburban towns, and the principal industry here is the mining of coal. Four mines are located within the corporate limits of this town, but the principal offices of these companies are in the city of Des Moines, and for all practical purposes belong to the city. The town supports a variety store, a blacksmith shop, a meat market, and various mechanical trades. An extensive business in market gardening is carried on here, the product being sold in Des Moines.

#### NORTH DES MOINES.

This is a suburban town containing a population of about five hundred, and adjoins the city on the north, as the name indicates. It extends a mile and a half east and west, and half a mile north from the limits of the city, and is a popular place of residence. The situation is elevated, and the surface, which is diversified with beautiful groves of native trees, is gently undulating, affording elegant residence sites. Many residences were built there last year, and a number more will be erected during 1886. The beautiful tract of land recently platted and placed in the market by the Polk County Homestead and Trust Company—who have improved and opened for the use of the public the beautiful Prospect Park—adjoins North Des Moines, and as a large number of these fine lots have been disposed of, and numerous elegant residences will be erected there the coming spring, this will undoubtedly stimulate building and improvements in

North Des Moines. A good class of citizens will also be drawn to this locality by the location of the University of Des Moines, which was made near Trospect Park last year. North Des Moines was incorporated in 1880.

## GREHNWOOD PARK,

Was incorporated in 1881, adjoins the city on the west, and is the most beautiful of our suburban towns. It contains some of the most elegant residences in this part of the country, and Greenwood Avenue, the finest drive in the city, extends throughout its entire length from east to west. It is very popular as a place of residence, many of our business mer preferring a residence there to the more crowded portions of the city, and most of the houses have telephone communication with the business portion of Des Moines. This is also the location of Elmwood Park in which the State Fair has been held during the past six years.

# UNIVERSITY PLACE.

This beautiful suburban place was surveyed and platted in 1881, and its frowth and development has been surprising. It is the seat of Drake University, and many handsome residences have been built, while many note are to be erected during the coming season. It is situated in the nor hwestern part of the city, is one of the most beautiful and healthful portions, and is populated with the better classes of our citizens, attracted to the locality largely on account of the University and its advantages. The street railway is being extended in that direction, and is expected to reach the place the coming summer. Broad and regular streets have been laid out, soine of which have been graded, and the sidewalk has been extended to the University campus. Besides an eight acre campus, a park of about eighteen acres, and some large lots, there are over four hundred residence lots for sale by the University Land Company, which are high, well drained, and well set with magnificent forest trees, that invite, and by their beauty, location, and the enterprise of their management, have already secured a population which of itself makes a fair sized town.

## CHESTERFIELD

Is just outside the southeastern limits of the city, and is laid out in convenient lots for residences, with appropriate streets and alleys. The many heavy manufacturing establishments in that locality already built and in operation, revealed to the founders of this suburban town that the hundreds of operatives necessarily employed now, and the additional hundreds to be employed in these establishments of wealth and industry, must be provided with suitable homes at no great distance from their places of labor. Hence the building of this new town, which has already become

Chesterfield has its own postoffice

one of our most important suburbs. and several retail business houses.

CAPITAL PARK.

This town adjoins East Des Moines on the north and was incorpor ated in 1884. It contains six hundred and forty acres, which have been platted and placed upon the market, and already many desirable lots have been sold, and the extensive preparations for building here in the coming spring indicate that many fine dwellings will be erected here during 1886. The C. & N. W. R. R., runs through this town and the company expects to establish a station here in the near future. The lots are high, well drained and have a fine growth of native timber, and altogether it is one of the most desirable of our suburban towns, for residence being nearer the business portion of the city than any of the others.

# TOWNS OF POLK COUNTY.

We have spoken fully of the city of Des Moines, which includes the townships of Des Moines and Lee, and also of the towns suburban to Des Moines. The article on the general interests of the county is given in the front part of the work, but we desire to speak briefly here of the principal towns in the county. Some of these towns, in the course of time, by reason of their nearness to Des Moines, and the fact that so many trains arrive and depart daily, will be considered suburban to Des Moines, and they are all pleasant and healthy places in which to reside.

MITCHELLVILLE.

The town of Mitchellville is located in Beaver township, about fifteen miles east of Des Moines on the C., R. I. & P. R. R., and also on the K. & D. M. branch. It was laid out June 2, 1867, by Thomas Mitchell, and has at present a population of about one thousand. It is a bright, healthy village, with some of the finest country in Iowa around it. Goal is found here in abundance. Competition is lively in nearly all branches of trade It claims to have the best flouring mill in the State, having taken the premium on flour at the State fair, in 1884.

The State Industrial School for Girls is located here, and has now about one hundred inmates.

Mitchellville is connected with over one hundred towns by teleplone, and supports a weekly paper called the Mitchellville Index. The jown has good schools and churches, and the society is excellent, making it a pleasant place for residence.

## ALTOONA.

The town of Altoona was laid out in 1868 by H. G. Davis and J. B. Busmun, is partly in Beaver and partly in Delaware townships, and is situated on the C., R. I. &. P. R. R., about ten miles east of Des Moines. The K. & D. branch also passes through the town. It has a population of about five hundred, and is a good shipping point for grain and coal. The principal industries of the place are the mining and shipping of coal and the manufacture of brick and tile, both of which are extensively prosecuted. Fire clay, as well, as coal, is found here in abundance. The branches of retail trade usually found in country towns are well represent. ed in Altoona. HOLK CITY.

Polk City was laid out November 8, 1850, by George Beebe, and is focuted on the C. & N. W. R. R., about fitteen miles north of Des Moines. It was incorporated in 1875, and has now a population of 500. Good building stone, mineral paint, potters clay and abundance of coal and timber hip found in this locality. Polk City has three churches of the Congregational, Methodist and Christian denominations; it has also an excel ent graded school and a good hotel, while the pusiness interests are represented by the following houses: Two general stores, one drug store and grocery, one hardware, one harness maker, one blacksmith, two wagon shops and two meat markets. It has also a flouring mill and a tile

The secret and benevolent societies are represented by Masons, Odd

Fellows, United Workmen and the Grand Army of the Republic. COMMERCE.

The town of Commence was laid out April 22d, 1871, by A. J. and J. A. Jack, long known as residents of Des Moines, is stuated on the C., R. I. d. II R. R., fifteen miles west of the city, and contains about two hundred inhabitants. It is located on a hillside overlooking the Raccoon River, and the principal industry is the mining of coal. The town has a gold school and church, and the business interests are represented by one gereral store, one grocery, one drug store and one blacksmith shop. The salso a grain elevator at this place, and several of the business men are argely interested in stock dealing.

## SHELDAHL

This town is located in the extreme northwestern portion of Lincoln township on the line of the C. & N. W. R. R., and is partly in Polk and partly in Story county. It has a population of nearly live hundred, and is

a good point for the shipment of grain. It has a good school, two hotels, and a number of retail business houses. Two firms are interested in the sale of agricultural implements, and there are several grain and stock dealers.

Other smaller towns of Polk county are: Runnells, on the W., St. L. & P. R. R., Hastie, on the same railroad, Ashawa, on the D. M. & Ft D., Clive, on the D. M. N. W., Grimes and Kelsey, on the same road Crocker and Ankeny, on the C. & N. W., Berwick, Bondurant and Santiago, on the Diagonal. There are in the county also the towns of Ottawa Peoria City and Saylorville.

To those desirous of a newthome, or location for business, in a pleasant, healthful country village, we would reccommend any of the towns of

our county.

#### DES MOI UNIVERSITY OF

PROSPECT PARK,

DES MOINES.

## Advantages of Location

The University, on West Ninth Street, Prospect Park, has quiet and beautiful surroundings. Campus is adjacent to the park proper, which contains over sixty acres, a place of green trees, coolshide running water, and singing birds,—the most beautiful, picturesque and popular resort in the vicinity of Des Moines. It enjoys all the advantages of city and country combined.

#### Courses of Instruction,

It is the aim and purpose of the University to afford educational facilities of the highest order, anlief such varied character as to meet the wants of all classes of students.

COLLEGIATE COURSES.—These are three in number: Classical, Philosophical, and Scientific.

PREPARATORY COURSES.—It is the purpose of these courses to give a thorough preparation enter the Freshman class either in this University or any other college.

In addition to the above the Institution offers Normal, Business, and English courses. There are always classes in the common English studies in charge of qualified and experienced teachers. Music, Painting, Drawing, and Elocution taught by competent instructors.

#### Board and Rooms

Good board will be furnished in North Hall at the uniform price of \$1.75 per week. In the same half-ing rooms are provided, for teachers and young lady students. The pleasant home life of the school is one of its valuable features. A high social and moral tone pervades the institution.

For circulars containing Courses of Instruction, Terms of Tuition, and all information, address,

# COURSES OF STUDY

1. PRBPARATORY. A two year's dourse under a teacher who gives her whole time to this work. It aims to give the young pupil a thorough drill in the dementary branches of a practical education.

2. NORMAL. A three year's course, including the branches taught in common schools, and one year of professional study and training. The public schools of Des Moines furnish exceptional advantages for increasing the professional advantages. for biservation and class criticism

3 COLLEGIATE. A four years course with three lines of study, 712

## CLASSICAL SCIENTIFIC AND ENGLISH

Each leads to its specific Diploma and Degree.

4. Unclassified pupils may elect from any of the courses of study such special branches as they may desire to jiuraue.

## SPECIALTIES.

1: MODERN LANGUAGES. The Natural Method is employed. The pupil at once begins to speak as well as to read the language studied. This the two-fold ends of discipline and practical skill is secured.

2. ELOCUTION AND DRAMATIC ART. A common sense system is employed. The end sought is ability to interpret correctly and express naturally thought and feeling.

33. FINE ARTS. A true School of Design is established. The mere mechanical work of copyng is not olerated. The pupil studies to understand and reproduce nature. This is true Art.

4. MUSIC-INSTRUMENTAL AND VOCAL. The Conservatory of Music is under the director of thoroughly educated musicians. A diploma is awarded to pupils completing the full course. Special attention is gived to technique and voice culture.

## EXPENSES.

These are neither so low as to necessitate the employment of incompletent teachers, nor so high as to be beyond the reach of any earnest, ambitious student. For particulars address

Facts Regarding White Bronze Monuments.

They will not corrode.
They contain no deserves in which water can collect and fleeze
They will not absorb the green from trees. and do not afford food for moss or lichens, so destructive to stone.
All ascriptions are in raised letters and will retain their legibility for large. An unattainable feature in ston) work.
Greater beauty and variety of design is attained, than

is possible in atone.

Leading architects, attorities and scientress commend them for beauty and durability. Over forty thousand of these monuments have been

exected, and letters from nearly every State and Territory, testify to their merit. They are equal in thickness, and superior in durability to intique bronze statuary that has stood for centuries. They are absolutely irve from all objections known

against stone. There is but one grade of White Bronze THE BEST Which purchasers can always depend on receiving.

The necessity for a more enduring material for moni-ments than stone has long been felt. It is well known that stone is unable to withstand climatic effects.

MONUMENTS AND STATUARY FOR DEMETERY PURPOSES

are produced of all eizes styles and designs competent artists, being constantly engaged in modeling original modumental designs, as well as statues, portrait busts, medalions, etc., to be used in connection with granite and bronze monumental work.

#### STONE MONUMENTS.

In speaking of the darability of stone, we lo not mea in a hundred years, but we do mean that there is abundant proof that stone will crumble and disappear entirely in a hundred years, but we do mean that there is abundant proof that stone will so crumble and crack and become so mose grown and dingy in color as to be unsightly, and the names and inscriptions illegible often in much less than one lifetime, in many cases being entirely broken down in less than twenty-five years. Not more than one-third of the old stone records in the New English in the New English in the New English is sectared time, to make them decipierable. hat the entire stone will crumble and disappear entire

# PENMANSI

# NORMAL DEPARTMENT

This department is designed to qualify teachers for their work. Those wishing to follow "The Profession" will be instructed

Business Penmanship, Pen Drawing, Flourishing, Stipple Work, Lettering, Card Marking, Black-Board Writing, Etc.

Teachers wishing to be ter propage for the work in their schools will be instructed in Plain Writing, Analysis, Methods of Instruction, Correction, Care of the Nerves, Material, its

# PRIMARY DEPARTMENT.

Pupils enter this department at lages ranging from 8 to 12, and are chrefully instructed in the best method of pen holding, positions, torms of letters, etc. Unless rightly states children form very bad habits, that must be broken at the cost of much labor, before the an become rapid penmen.

# INTERMEDIATE DEPARTMENT.

This department is for young and middle aged men and women, and is devoted Plain Business Writing. All superfluous lines are discarded

# INDIVIDUAL INSTRUCTION

OUR:PLAN

Largest and Finest Collection of Pen Work in the West.

21 First Premiums Awarded Our Work in 3 Years by State Fair

# PLAIN BUSINESS WRITING OUR SPECIALTY.

Note—We have on exhibition at the Institute 100 twenty-line exercises written by pupils is from \$10 minutes each. The name and age of the pupil-appear on each specimen.

Note—The hight of perfection in Pan Art is Good Business Writing. This we present in the shorter plainest and most simple manner, believing that the essential qualities of true penmanship—legis plainest and elegance—are to be found in a true knowledge of the forms of letters and how to precise.

Note—Although it is desirable that the instructor excelling the execution, it is vastly more impossible that he be able to develop proficiency in others: Hence a teacher's success should be measured by that this publis.

# EXCELSIOR SLATE PAINT

# A Perfect Preservative of Shingled and Metal Roofs.

# IT ARRESTS DECAY IS IMPERVIOUS TO WATER

It has stood the test of years—the best test known—and has the endorse ment of the best building owners in this country and England.

The Company have the entire control of this Slate Paint, and are the only ones authorized to use it, it being manufactured only in two cities in the United States—Boston, Mass, and Pittsburgh, Fa., and the large amount used by the Roofing Slate Paint Company the manufactures have given them the exclusive sale of it. The growing popularity has induced different parties to counterfeit it; and great care should be exercised lest Iyou should be imposed upon by these parties. But by dealing with the Roofing Slate Paint Company all will be assured against imposition.

# TESTIMONIALS

We take pleasure in referring you to a few of the thousands who have the Excelsior Slate Paint in use on their buildings in Des Moines: F.S. Whiting, Contractor and Builder; E. D. Smith Contractor and Builder; William Hough, Contractor and Builder; A. M. Drake, Contractor and Builder; Walter Davis, Contractor and Builder; H. Keemer, Contractor and Builder; S. A. Robertson, Contractor and Builder; J. Kuhn, Red Estate; Col. R. Ankeny, Real Estate; F. D. Harris, Real Estate; V. P. Wilson, Painter; J. J. Deane, Painter; P. F. Bautle, Attorney; J. F. Phllips, Attorney; A. J. Kingsbury, Attorney; George White, Wholesale Merchant; H. Riegelman, Merchant; Tone Bros., Wholesale Merchant; Dr. Turner, Prop. Des Moines Street R. R.; John Clemm, Retired Farmer; A. Anderson, Prop. Green House; G. T. Carpenter, Chancelor, Drake University; B. E. Shepperd, Professor Drake University; B. W. Bowen, Prin. Business Col.; J. P. Bushnell, Secretary Board of Trade.

# DO NOT FAIL TO GIVE IT A TRIAL.

It has stood the test for ten years and proven its worth above all other roofing compounds, both in the United States and England, and to-day stands the acknowledged King of Roofing Paints, a monarch without a rival.

JAS R. CLARKE, Manager

The oldest and most reliable edal firm in Des Mpines. We are

# HEADQUARTERS FOR HARD COA

Carrying the largest and best selected stock in the city. All sizes constantly on hand, and of the best quality, carefully sereened, and prices always as low as the lowest.

# IN SOFT COAL

We claim to have better facilities for shyplying the good people of Des Moines than any other coul firm. Our coal is all hauled direct from our own mines by wagons, and deliv ered to our customers with but one handling—thus saving the breakage and waste that frequent handling causes, and giving our customers the FRESH MINED COAL, which is always the best. Our mines being located nearer to the center of the city than any other gives us these advantages, and enables us to always supply our customers promptly, is gardless of bad weather or bad roads, or blockaded railroads.

In addition to-having the best quality of coal, and the most careful and promptest delirery, we have lately purchased the exclusive right for this county of a newly

# Patented Chemical Preparation

Which applied to Soft Coal greatly enhances its value as fuel We are now supplying all sizes of coal thoroughly treated with this patent process. Our coal thus treated will make One Fourth More Heat, will burn up cleaner, and make less ashes, less smoke, and less soot than any other soft coal. In fact this coal will make

# ABSOLUTELY NO SOOT AT ALL,

And will actually clean out the sort from sloves, stovepipes and flues. Horizontal stove pipes, small chimneys, and chimneys having poor or insufficient draft can all be utilized by using our Patent Proc. st Coal.

THE WELL-KNOWN AND POPULAR NATIONAL SERIES OF STANDARD

### SCHOOL & COLLEGE TEXT-BOOKS

The series of school books known and popularly used in every section of the Unit States, and every class of citizens, representing all shades of political opinion and religion belief.

The series is complete, covering every variety and grade of science and literature, from the Primer which guides the lisping tongue of the infint, to the learned West Por

The Series is uniformly excellent. Each volume, among so many, maintains its or standard of nerit, and assists, in its place, to round the perfect whole. It is the pride of the publishers that their imprint appears in not a single poor orked Its appearance, therefore, upon a title page is a sort of guarant indifferent text book.

which the educational public have learned to respect.

For these reasons, this series has been justly denominated the NATIONAL SERIES OF STANDARD SCHOOL BOOKS,—a title which is now universally conceded in broadest sense, and which cannot, with equal propriety, be applied to any rival seasons.

The National series comprises more than three hundred publications, representing in books adapted to every grade of common schools and college classes. Specimen present free of cost to any address. Descriptive catalogue free. Address,

SI BARNES & CO., 34 and 36 Madison Street, Chicago 111 and 113 William Street, New York.

### The Goodwin Gas Cooking Stove.

. These stoves are constructed especially to meet the requirements of mestic economy.

Economical and inexpensive cooking is obtained by the simple method every particle of heat derived from the gas.

#### ADVANTAGES.

An open Roaster.

Free from all contact with gas.

A well ventilated Uven.

No confined vapor.

A regular diffused heat. A Griller free from smoke A Hot plate fitted with parent air and gas burners, arranged for Bo

7. A Hot plate fitted with patent air and gas burners, arranged for Boing, Stewing and Frying.

A family dinner can be cooked without the aid of any other appliance of Roasting, Baking, Boiling, Grilling, or Toasist can all be carried on, and each process can be regulated to the greate nicety by the adjustments with which each stove is fitted.

These stoves have been submitted to every possible test, and can be the fore confidently recommended as doing all the work of a kitchen rangely more cleanly, economic certain and efficient manner, and no one, andess previously informed, would be the least idea that Joints roasted by here reflecting Gas stoves were not cooked before a coal fire.

All ordinary culinary utensils can be used in cooking that have a flat bottom. Copper heats quickly but the tinned or enameled is very good, and by many preferred.

For sale by Capital City Gas Light Company. Also dealers in
